Motion Perfect® Adjustable Foundation

This upgraded version of the popular Motion Perfect® model packs in all the bells and whistles for even more ways to customize your comfort. A wireless remote lets you adjust the head and/or foot of the mattress, program up to two of your favorite positions or use the Zero Gravity pre-set position for a weightless, zen-like experience. Plus, Serta's EasySeat™ technology adjusts the shape of your mattress with very movement of the base, so your body rests even more naturally as you move from one position to the next. And, since we know your partner's snoring can ruin even the most comfortable position, the remote now has an Anti-Snore head tilt feature.

Once you've found the perfect position, you can indulge in our whisper-quiet massage settings while conveniently charging your devices with built-in USB ports. Additionally, the 3-in-1 adjustable legs ensure this base will be the perfect height for your existing furniture.
