LATITUDES COLLECTION

Putting Comfort and Quality on the Map

Flexsteel's Latitudes Collection offers a striking combination of style, beauty, comfort, and quality. Comprised of a variety of reclining furniture, sofas, accent chairs, and sectionals, the Latitudes Collection exemplifies bold design, exquisite tailoring, and luxurious upholstery. And, as always, you'll find our namesake Blue Steel Spring at the core of this collection's superior construction.

You could search the globe for the ideal balance of style and craftsmanship, but at your journey's end, you'll choose the unmatched comfort of the Latitudes Collection.

Quality Construction

We construct our Latitudes Collection furniture with care and precision, and we hold ourselves accountable for every detail. We believe the end result makes the extra effort worth the many years it lasts.

The precision-engineered frames are constructed of fine crossgrain laminates and feature one-piece arms, unitized for durability. Tailored seat cushions designed for exceptional comfort are composed of a high-resiliency, high-density polyurethane foam core wrapped in layers of soft polyester fibers.

DualFlex® Spring System

Designed to achieve a new standard in superior seating comfort, the DualFlex Spring System uses thick, evenly spaced steel ribbons along the length of the frame from front to back. The ribbons are attached to the spring's frame with resilient helical coils that allow for a wider range of motion. The entire system is securely bolted to the seat frame for extra support. We believe so strongly in this spring, we guarantee its durability for a lifetime of use.
