

EBF- ENZYME BREAKDOWN FORMULA

'For the best of the best quality produce'

- ▶ Superior productivity at every stage of development. For massive roots and juicy fruits.
- ▶ Contains All amino acids combined with a full spectrum of 96 trace minerals.
- ▶ Produces heavy denser yields and the best possible quality produce from all your plants.
- ▶ Increased mineral absorption at root level to create huge yields with better stronger smells, tastes and flavors.
- ▶ Supercharged Sugar, resin and essential oil production.
- ▶ Health tonic for deficient or stressed plants. Helps and supports cellular metabolism to revive any stressed plants, seedlings or clones.
- ▶ Save you money by allowing you to Reduce mineral feed by up to 50%.
- ▶ Use as foliar to increase growth, rates of photosynthesis & mineral absorption.
- ▶ Used as foliar to control insects and pests.

ACTIVE SUGARBOOST

Boosts Roots, fruit and flower production.

Live microbial Superbloom and root enhancer

- Stimulates massive sugar production.
- Supercharged rootzone
- Extremely strong aromatic compound stimulation
- Large healthy plants pest and stress resistant plants
- Increased yield and quality
- Food grade ingredients

When using Active SugarBoost Expect an explosion of sugar production from your plant

- ▶ A Massive increase of Terpene & essential oil production
- ▶ Increased yield
- ▶ contains live enzymes which lower the required energy for photosynthesis sugars to be produced, resulting in optimised energy conversion and massive root and fruit production. Along with rich strong smells, flavours and tastes,

Bio Active Compost Tea

Contains millions of beneficial microbes

which work synergistically with plant roots and stimulate optimal growth from a cellular level

- ▶ **Compost tea is a balanced and organic nutrient-rich all purpose fertilizer and immunity builder. Compost tea can be used on all plants from seedlings, flowering plants, vegetables, houseplants, and crops of all kind to increase growth, blooms, yields and especially flavours and tastes.**
- **Larger healthier plants from seedling, veg to flower.**
- **Creates super immunity against disease causing pathogens and increases pest resistance.**
- **Supercharged rootzone and mineral uptake.**
- **Massive sugar production.**
- **Increased yield and superior quality.**
- **Extremely strong terpene production.**
