Group: LOS DRAGONES Teacher Milli
Month: November Week 1: 03-07/2025
Theme: Cohetes y estaciones espaciales

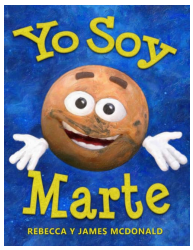

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
03	04	05	06	07
				
Caja Sensorial				
Colorful rocks, space themed figurines, tin foil balls, clear cups and fine motor scissor scoops 				
Circle Time				
Theme Song: Song Link Recuerdame Activity: During circle time, the teacher will explain the tradition of the Day of the Dead altar, and together we will build the altar. On this occasion, we will combine the circle time activity with the main activity.	Theme Song: El espacio exterior 🚀🪶 | Canción de viajes espaciales para niños | HeyKids - Canciones infantiles Activity: Have you ever wondered what space stations are for, or what goes on inside a space rocket? These amazing machines help astronauts explore space, live and work beyond Earth, and make exciting scientific discoveries. We'll take a closer look at what we find inside space stations and rockets—and what really happens inside them.	Theme Song: El espacio exterior 🚀🪶 | Canción de viajes espaciales para niños | HeyKids - Canciones infantiles Activity: Together, we will wonder about the stars, planets, satellites, and the tools astronauts use when they leave the safety of their station. What do we need to make our space station work? Space stations need energy, air, water, and communication systems to keep astronauts safe and connected. We will think like engineers.	Theme Song: El espacio exterior 🚀🪶 | Canción de viajes espaciales para niños | HeyKids - Canciones infantiles Activity: How would we leave Earth if we ever had to? What would we need to take with us? We'll imagine traveling into space and think about what astronauts need to live far from home—like water, food, and tools. We'll explore how we can help by sending supplies to their space station, just like helpers on Earth.	Theme Song: El espacio exterior 🚀🪶 | Canción de viajes espaciales para niños | HeyKids - Canciones infantiles Activity: Before we begin our game, we will explore and name a collection of space-related items together—objects like rockets, stars, planets, or astronauts. We'll take time to observe each one, noticing their shapes, colors, and names. Then, the game begins! Each round, one object will be quietly removed, and we'll ask our friends, "What's missing?

Vocabulario				
Recuerdos, familia, mascotas, flores (el cempasúchil, frutas, pan de muerto,	★ What is a space station? ★ What kind of spaces do you need to live in? • Working • Observation • Earth • Weather	• Astronaut • Satellite • Space rocket • Planet • Moon	What do we need to live? What does the astronaut need to live? How does food get delivered to space? • Astronauts • Supplies: food, water • Mission	• Space • Surrounding • Solar panels • Energy • Light • Heat
Group Experience				
Celebracion Dia de los muertos	**Living in space**	**What's missing, game**	**Sending a rocket to space**	**Solar panel**
				
Area: Social, sensory, cognitive, language, art. **Description:** **Day of the Dead** celebration, each class will prepare an altar with fruits, flowers, and bread. We will ask families to send a photo of relatives or pets who are no longer with us. During the celebration, we will share pan de muerto and hot chocolate, as part of the Mexican Day of the Dead tradition.	**Area:** fine motor skills, imagination **Description:** Together, we will imagine and create a living space inside a space station. Each child will help design areas they believe belong there—through drawing, painting, and building. Using loose parts like cups, cones, and found materials, our shared space will grow with everyone's ideas.	**Area:** Memory, observation, vocabulary **Description:** We will invite our friends to join us in a collaborative memory game using space-themed objects. Together, we will explore 4–5 carefully chosen items placed on a tray—such as a rocket, a planet, an astronaut, a star, or a space tool. After observing the objects and naming them together, we will gently cover the tray with a blanket. One item will be secretly removed, and when the blanket is lifted, our friends will use their observation and memory skills to figure out which item is missing. This playful activity supports vocabulary development, strengthens memory, and encourages attentive looking and listening.	**Area:** science, imagination, pretend **Description:** We will invite our friends to join us in a shared pretend play experience: sending a rocket into space carrying important supplies for astronauts living aboard a space station. Together, we will co-construct a mission—deciding what the astronauts might need, how we will prepare the rocket, and what roles we will take as scientists, engineers, and mission control specialists.	**Area:** science, technology, pretend, experimentation **Description:** Together with our friends, we will explore how light and heat can be captured and transformed. We will co-construct small solar panel boxes that reflect light and absorb warmth from a lamp, much like how real solar panels collect sunlight to create energy. Through this shared experience, we will deepen our understanding of how electricity can be produced—even in space. This project invites curiosity, experimentation, and wonder as we discover the power of light and our role as researchers of the world around us.

Month: November Week 2: 10-14/2025
Theme: ¿Cómo se vive en el espacio?

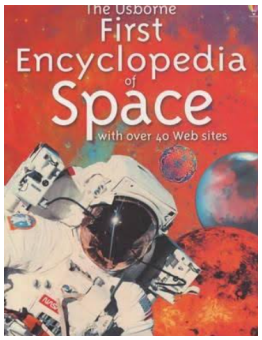

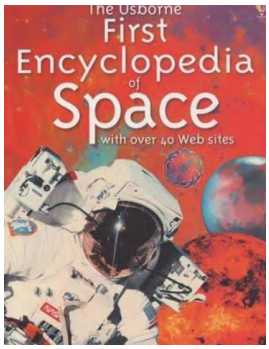

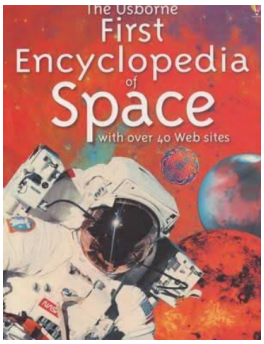

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
10	11	12	13	14
				
Caja Sensorial				
Sensory box: water, strainers, aluminum foil balls, stars. 				
Circle Time				
Theme Song: Mi Viaje Espacial - ClaraLuna - Lyric Video Activity:	Theme Song: Activity:	Theme Song: Mi Viaje Espacial - ClaraLuna - Lyric Video Activity: Watercolor planets will be created with markers. First, coffee filters will be flattened into a basket shape and placed on a table with water based markers for the children to decorate their paper circles in any way they wish and then with an atomizer they will spray the coffee filter until they get beautiful colors of the planets.	Theme Song: Mi Viaje Espacial - ClaraLuna - Lyric Video Activity: Simulate space cleaning using foam and then wet wipes. Explain that in space there are no showers like on Earth. Children can explore with their hands and can "bathe" dolls with foam and then wipe them with wet cloths, imitating how astronauts clean themselves.	Theme Song: Mi Viaje Espacial - ClaraLuna - Lyric Video Activity: The children will prepare some banana oatmeal snacks, the children will be invited to mash the banana with a fork and they can add a little cinnamon, then add the oatmeal and mix with their hands. Then they will form small balls or cookies with help and be able to eat them.

Month: November Week 3: 17-21/2025
Theme: Podría haber vida en otros planetas?

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
17	18	19	20	21
				
Caja Sensorial				
Small rocks, dried out branches, hammers 				
Circle Time				
Theme Song: Se buscan extraterrestres - (Letra: Gloria Fuertes | Música: Andrés Meseguer) Activity: We will talk about life on our planet and what kind to live. After that we will talk about the different living creatures whose necessities for living are different from ours.	Theme Song: Se buscan extraterrestres - (Letra: Gloria Fuertes | Música: Andrés Meseguer) Activity: We will ask questions about how we imagine life in other places. We will talk about one of the moons of Jupiter that's covered by ice but which might hold oceanlike life underneath.	Theme Song: Se buscan extraterrestres - (Letra: Gloria Fuertes | Música: Andrés Meseguer) Activity: We will be talking about the different life forms that exist. Life forms can also be so small that we can't see or touch them, like bacteria.	Theme Song: Se buscan extraterrestres - (Letra: Gloria Fuertes | Música: Andrés Meseguer) Activity: Humans send robots to discover new places in our solar system. We will talk about exploration and possible new places to find life. What does the surface of Mars look like?	Theme Song: Se buscan extraterrestres - (Letra: Gloria Fuertes | Música: Andrés Meseguer) Activity: Why would an animal get sent to space? We will talk about space travel and will touch on the topic of Laika, the space dog.
Vocabulario				

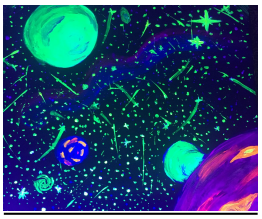

★ What do we need to have in life? • Air • Oxygen • Food • Earth • Astronomer • planets • extraterrestrial • Pioneer probe	★ What do you think life is like on other planets? • Different • Extreme • Strange • Surface • Probe	• Life • Elsewhere • Space • Intelligent creature • Slime • Bakteria • Moss	• Robots • Explore • Space • Mars • Planets • City • Solar system • study	• Space travel • Laika • Dog astronaut • What does extinction mean? • Animals • Extinction
Group Experience				
Reaching out	**Creating our version of Europa**	**What might aliens look like?**	**Studying rocks and dirt from Mars**	**Sending animals to space**
				
Area: Science, fine motor skills **Description:**Sending Our Pioneer Probe into Space Together, we will imagine launching our very own space probe, carrying messages from the Dragones group. Inside, we'll include a group photo, a hand-drawn map showing where to find us, and a sound recording of our voices. Through this symbolic journey, the children express identity, connection, and imagination—sharing who they are with the universe.	**Area:** sensorial, imagination, chemistry **Description:** We will invite our friends to explore a hidden world beneath the ice. Using droppers, salt, and tweezers, the children will carefully melt the surface to reveal what's underneath—just like scientists searching for life under the icy crust of Jupiter's moon, Europa. This sensory experience encourages curiosity, fine motor skills, and wonder about the mysteries of space and nature.	**Area:** chemistry, sensorial, science **Description:** We will invite our friends to sprinkle powder onto water and gently dip in their hands to see what happens. The powder creates a barrier that keeps the skin dry, revealing how some materials can repel water. This hands-on exploration invites wonder, discovery, and early thinking about chemistry and surface tension.	**Area**: Science, exploration, imagination, sensory **Description:**We will create a Mars-inspired landscape for our friends to investigate using magnifying glasses and paintbrushes. As little explorers, they will search for textures in rocks, soil, and natural materials—observing closely and discovering like real scientists on a new planet.	**Area:** Dramatic play, imagination **Description:** Our friends will choose a stuffed animal to prepare for a space expedition. Together, we will dress them in suits, make helmets to protect them, and gently get them ready for their big journey. Through this imaginative play, children explore empathy, responsibility, and the idea of caring for others—even far away in space.
