

PRECISION CNC MACHINING | AEROSPACE & DEFENSE

Veteran-Owned Small Business • Tempe, Arizona

CORE COMPETENCIES

- Contract Production Machine Shop
- 5-Axis CNC precision milling of complex geometries (2026 - Haas UMC500SS)
 - Pallet Pool Ready for future Automation
- Aerospace and defense components manufactured to stringent customer specifications and quality requirements from aluminum, copper, stainless steel, titanium, and other high-temperature alloys.
- Mfg. process development, CNC programming (Mastercam), and Design for Manufacturability (DFM) Support
- Precision inspection and dimensional verification using CMM (2026 - Mitutoyo - CRYSTA-Apex V574 PLUS)
 - Software (MiCAT and MCOSMOS)
- ProShop ERP/QMS for complete traceability, process control, quoting, and quality management.

DIFFERENTIATORS

- Veteran-Owned and Operated Small Business
- Direct principal involvement in operations and customer engagement
- More than 25 years of hands-on expertise in mfg. process development, design, programming, and CNC operating
- Low-overhead structure that supports competitive pricing and accelerated turnaround times
- Progressing toward AS9100, ISO 9001, and ITAR registration for aerospace and defense compliance
 - ITAR Registration has been submitted as of 07/21/2026.
 - AS9100D - Actively implementing towards the goal of a mid-September deadline for Certification.
 - CMMC - Future goal to achieve - not yet implemented.

RELEVANT EXPERIENCE

MajX CNC applies extensive practical experience in precision manufacturing to deliver high-quality custom CNC parts. Leadership expertise encompasses full process ownership; from New Product Introduction (NPI) of customer drawings and models through programming, machining, inspection, and continuous improvement. The company emphasizes risk assessment, revision control, and alignment with customer quality requirements for aerospace and defense applications.

COMPANY INFORMATION

Legal Name	Year Established	Primary NAICS	Ownership Status
