

3 Lakes Improvement District

TLID

Minutes from meeting of: 11/2/2020

John S P

Walt M A

Nancy H P

Scott R P

Harry E P

Diane S A

Mike F P

Kenzie P P

Guests: none

Call to Order at: 6:00 PM

Adoption of Agenda: Motion by Harry E 2nd by John S pass
Changes - Add Curly Leaf Pondweed 2021

Approval of Minutes: Motion by Harry E 2nd by John S pass
Changes - none

Financial Report: Bills paid: \$400.00 (Insurance)

Account balance: \$73,232.27

Motion by John S 2nd by Harry E pass

Officer Reports:

Chair:

- Point of interest - Big Eagle Lake has a huge algae problem - they are considering Alum treatments. Big Eagle is a 350 acre lake in Sherburne County. We will keep a watch on this if it progresses to monitor effectiveness and cost.
- Scott has contacted Jake Walsh at the DNR to request our \$950.00 grant check for surveying.

Vice-Chair: absent

Secretary: nothing

Treasurer: absent

Advisor: Reminder there is a Healthy Lakes Meeting this week on Thursday, November 5, 2020 at 6:30.

Old Business:

- The T-LID carryover policy was reviewed and discussed. Nancy will continue to work on this and will present a revised version at the December meeting.
- James Johnson Update - members were all sent and have reviewed the two reports: The Point Intercept Survey for Briggs and the EWM report for the Briggs Lake Chain. These reports were compiled by James Johnson of Freshwater Scientific Services.
- Weise Property - no updates.
- Wenck Report

The T-Lid board reviewed the Wenck Report that was finalized this month.

After much research and data collection there were three recommendations made:

A Sheet Pile Weir at the mouth of the bayou channel.

Wetland B Impoundment.

Cover Crop Implementation.

It was decided that Scott would invite Dan Cibulka, SWCD, to a future meeting to share his insight and expertise regarding the Briggs Lake Chain Wenck Report (hopefully in March or April).

New Business:

- Elk Lake TLID - Kenzie and Scott have agreed to meet with Elk Lake residents when they are ready to move forward with this.
- Curly Leaf Pondweed 2021 - Mike F
Mike F presented information regarding the spraying of the lakes next year for Curly Leaf Pondweed. The Freshwater Scientific survey recommends 94.7 acres to be sprayed but the DNR will only allow us to spray 66.5 acres.
Mike F presented a proposal on how to make this happen. Because this was the committee's first look at this proposal it was decided to review it again next month and make some decisions. Harry E and John S will specifically focus on the west side of Briggs Lake since that is one of the largest cuts in spraying that Mike F is proposing.
