About Prima Exports

Prima Exports is a specialized exporter of premium Indian dairy products.

Established by industry veterans with over four decades of experience in the Indian dairy sector, **we bring more than just access—we bring insight.** Our long-standing relationships with top-tier dairies across the country give us direct access to high-quality, consistently produced goods from state-of-the-art facilities.

Thanks to our in-depth understanding of seasonal variations, regional specialties, and evolving quality standards, we're able to curate the best products tailored to global market needs. Our team knows how to identify exceptional texture, shelf stability, taste profiles, and supply reliability—traits that only come with years of hands-on experience.

Whether it's fresh ghee from Gujarat, paneer from Punjab, or high-fat SMP from Maharashtra, we know where to find it, when to source it, and how to export it right.

Prima Exports is your partner for authentic Indian dairy—with quality you can trust and experience you can count on.

Our Advantage

Product Insight

Our team possesses in-depth knowledge of critical parameters such as fat and SNF ratios, microbiological stability, thermal processing impact, and packaging performance—allowing us to select products optimized for extended shelf life and global transport conditions.

Nationwide Sourcing Network

We maintain direct partnerships with FSSAI-compliant and ISO/HACCP-certified processing plants across India, enabling region-specific sourcing (e.g., buffalo milk SMP from North India, high-aroma ghee from Gujarat) to meet targeted buyer requirements.

Market-Ready Selections

With strong familiarity in EU and USFDA regulatory frameworks, we ensure all products meet necessary documentation, MRL, and labeling standards—streamlining approvals and import compliance in destination markets.

Consistent Quality

Through supplier audits, batch-level quality checks, and cold chain integrity monitoring, we guarantee reliability in fat content, microbial load, texture, and sensory profile—minimizing rejection rates and optimizing repeat orders.
