FOR IMMEDIATE RELEASE

ABACUS EMERGING TECHNOLOGIES™ LAUNCHES TO DELIVER AI-DRIVEN, SECURE, AND SCALABLE SOLUTIONS FOR MISSION-CRITICAL ENVIRONMENTS

Maryland, USA — January 28, 2026 — **Abacus Emerging Technologies™**, a Women-Owned Small Business (**WOSB**), today announced its launch as an emerging technology firm delivering secure, scalable, and innovative solutions designed to accelerate mission outcomes across government and commercial sectors.

Abacus integrates Artificial Intelligence (AI), Machine Learning (ML), advanced cybersecurity, cloud computing, and data analytics to help organizations modernize operations, reduce risk, and enable informed, data-driven decision-making. The company aligns with GSA's Emerging Technology objectives, supporting rapid adoption of high-impact, future-ready capabilities.

"Abacus was built to help organizations move faster and smarter without compromising security," said Louise Venkatesan, President & CEO of Abacus Emerging Technologies™. "We deliver intelligent, mission-focused solutions that are scalable, sustainable, and secure."

Core Capabilities:

- Data Analytics and Visualization
- Artificial Intelligence and Machine Learning
- Cybersecurity and Zero Trust Architecture
- Cloud Computing
- Robotic Process Automation (RPA)
- Internet of Things (IoT)
- DevSecOps

About Abacus Emerging Technologies™

Abacus Emerging Technologies™ delivers innovative, secure, and scalable technology solutions that enable operational transformation and mission success through intelligence-driven design and precision execution.
