

Feature Install

GRAND DESIGNS

Magic
Thermodynamic Box®

2014 saw the Magic Thermodynamic Box company appear on Channel 4's Grand Designs TV program. We were initially approached by Gregory Kewish, a Californian architect based in Cornwall looking to build his family's dream home. He explained to the team

his vision to build a Passive House using the LMTB as a stand alone water heater to generate all of his family's hot water needs. During this time the project sparked interest from Channel 4. Over the course of the installation the team spent time with the Grand Designs

production company and Kevin McCloud who also featured the technology as his "Green Hero of the month" in his TV Show's monthly magazine. The installation was recently featured again in the Grand Designs Revisited show.

Contact the team now to find out more about the benefits of the LMTB and how it can generate up to 100% of your hot water demands day and night, all year.
