

# Feature Install Starbucks

2016 has seen the Magic Thermodynamic Box company introduce the MCS approved LMTB IV into a franchise Starbucks coffee shop. Seeing Starbucks embrace

this hot water renewable energy product as a business ambassador and setting such an example to its coffee drinkers is fantastic news and really does show how

powerful the latest little box is! The new software within the LMTB IV ensures that the water storage cylinder is heated up when the demand is most needed.

The Thermodynamic panel can be installed horizontally or vertically on any wall or roof

Contact the team now to find out more about the benefits of the LMTB IV and how it can generate up to 100% of your hot water demands day and night, all year.
