

Joseph The Project

Inspired by Genesis - Chapter 41
www.knightstemplarchurch.org

You are invited to join in with preparations for the beginning of tribulation before it's too late. Economic survival and freedoms are under attack. Our children's safety and futures are being demolished by traitor politicians. **All that we love is in harm's way!**

With globalist agendas now in full swing and the immanent impact of climate cult policies on the horizon we must now **develop our own networks** of like-minded individuals and communities to resist the unelected tyrannical global government.

Vision: Individuals, Households, Communities and Businesses will develop a 'Bartering' economy that will primarily sustain itself by trading skills, labour, produce and other services within accessible parameters i.e. achievable logistic territories. Local people will freely trade with each other without government interference.

Cash or digital tender would not be encouraged. **Everyone needs to become a producer or provider.** This way everyone can be a consumer in the local economy avoiding the globalist-controlled banking systems, corrupted government tax theft and the inflationary impact of the current and worsening cost of living.

Mission: To engage all age groups. To learn basic skills for food/medicine production as well as essential trade skills such as plumbing, carpentry, building, electrician and engineering from experienced members of our communities. **These will be the last human skills to be made obsolete by the International Socialist controlled AI systems.**

Things to think about:

Digital ID	Cost of Living
Carbon Tax	Barbarian Invasion
Social Credit Score	Christian/Patriotic Persecution
Global World Order:	Destruction of Rights & Freedom
World Economic Forum, UN, WHO, Agenda 2030 & AI etc.
