Museum Quality Exhibit & Programming

## DR. FUNNY BONES

### Dear Event Coordinator,

Experience North America's most unique Hands-On Educational (and Entertaining) Program! Let us take you and your participants on an interactive exploratory journey of hippology. Almost everyone thinks they are interacting with Dinosaur bones and are amazed when they learn that it's not. We can accommodate a variety of needs and group sizes, and with over 25 years in outreach programming experience we guarantee an exceptional presentation. Dr. Funny Bones has traveled the world and is a featured program at the Calgary Stampede, don't miss out on this very edutaining experience!

### What is Dr. Funny Bones?

Our Dr. Bones Module is an indoor/outdoor...good weather/bad weather... cross-platform program that is designed to bring experiential learning in a fun and interactive way. Discover the differences between a paleontologist and an archaeologist while participating in an authentic dig. Participants examine the process and factors that lead to the discovery of bones while they unearth, analyze, classify and assemble a full size skeleton. Watch participants work individually and as a team while they problem solve the puzzle of assembly. You will be amazed at how much fun they have while they learn and understand about form and function by actually handling the bones and joints.

### 3 Program Options Available:

1. **WORKSHOP CLINIQUE:** Working with a single group unit we will "Dig and Build" the skeleton right at your location. Program length is approximately 90 minutes long. (*Team Building activities skip the dig*)
2. **THE BONE SHOW:** A 25 minute interactive hands-on show designed to accommodate multiple groups. Participants learn about anatomy while having their funny bone tickled. The presentation is targeted for kids of all ages. A Great Family show to add to your event.
3. **EXHIBIT MODULE:** A fully interactive display that can be located at one location, or mounted on wheels and moved around. Rather than fixed scheduled presentations, we interact with participants as they come and go. Participants can come and go as they please and stay as long as they like.
