What is the best phone # to reach you? _____

May we leave a message for you on this number or text you at this number? ❑ Yes ❑ No

What services are you requesting to be scheduled?

❑ Assessment

❑ Individual Speech Therapy

❑ Group Social/Play Group

❑ I'm not sure what my child needs. *(Please send us all previous reports and we will give you input on this)*

ASSESSMENTS

My child needs to be assessed: ❑ Yes ❑ No ❑ I'm not sure

I would like the following type of assessment: *(Please note-you are not committing to anything by requesting these services. This is just to give us a starting point and idea of what you are looking for. Once we meet with you, we will decide together what services should be scheduled)*

❑ **Articulation Assessment** *(how your child pronounces sounds in words, sentences and conversation, oral-motor exam)*- **$450**

❑ **Bilingual Articulation Assessment in 2 Languages: $750** (Please circle your choice:

English/Mandarin; English/Cantonese; English/Malay)

❑ **Articulation Assessment with Phonemic Awareness Testing** (*how your child pronounces sounds in words, sentences and conversation, oral-motor exam)* This also includes phonological awareness testing *(how your child is learning sound positions, blending sounds as needed for sounding out words for reading and spelling)* and possibly a hearing screening. This is generally recommended for children with multiple articulation errors ages 4 and up. **$650**

❑ **Birth-Age 2: Comprehensive Speech-Language Assessment - $1200** This includes everything: language comprehension and expressive language development, pronunciation, oral-motor exam, social/play and engagement, attention span, getting input from any daycare/preschool teachers.

❑ **Bilingual/Multilingual Birth-Age 2** Additional language exposure of more than 30% in addition to English requires additional time to properly assess/compare languages so the fee is slightly higher **$1500**

❑ **Add-on Screening for Autism Spectrum Disorder with Comprehensive Assessment of the ADOS (any age) $799: Autism Diagnostic Observation Schedule 2nd edition.** This adds approximately an hour to the comprehensive speech-language assessment. It includes the administration of the ADOS, which will be included in the final report and review.

❑ **Add-on Screening for Autism Spectrum Disorder with previous comprehensive Assessment of the ADOS** (any age) **$1500** If you already have a comprehensive speech-language assessment from another practice within the past 6 months, this can be done as a separate service. A "screening" provides information about the likelihood of an autism diagnosis, but would need to be confirmed by a physician, psychologist or multi-disciplinary team. We will also review home videos, conduct play observations, consult with the child's preschool/school professionals, provide a written report, which will be reviewed with the parent(s).

❑ **Age 3 to 4 years 11 months: Comprehensive Speech-Language Assessment**: **$1800.** This includes everything: language development, pronunciation, engagement and attention span, oral-motor exam, social/play and getting input from any daycare/preschool teachers. If the child is not yet talking and a possible candidate, we can also trial an assistive augmentative communication (AAC) device; if at least 4.5 years old and has multiple speech errors, we may also administer phonological awareness tests.

❑ **Age 5 years to 6 years 11 months: Comprehensive Speech-Language Assessment** $**2200** This includes everything: language comprehension and expressive language development, attention span, pronunciation, oral-motor exam, social/play, auditory memory, getting input from any daycare/teachers or school-based SLPs if desired, and if the child is not yet talking and a possible candidate, we can also trial an assistive augmentative communication (AAC) device. If the child has multiple speech errors we may also administer phonological awareness tests and possibly a hearing screening.

❑ **Ages 7 and up: Comprehensive Speech-Language Assessment $2500** This includes everything: language comprehension of questions and stories, following directions, expressive language development, pronunciation, oral-motor exam, social/play, getting input from teachers, psychologists, OTs and/or school-based SLPs if desired. If we feel there may be possible word retrieval or auditory memory or processing issues, we will add those tests and possibly a hearing screening. If the child is not yet talking and a possible candidate, we can also trial an assistive augmentative communication

(AAC) device. If the child has multiple speech errors we may also administer phonological awareness tests.

❑ **Bilingual Assessment for Toddlers/Preschoolers up to age 3 years 11 months** (Mandarin/English or Cantonese/English) **$2300** This includes everything: language comprehension and expressive language development in both languages, pronunciation analysis in both languages, engagement and attention span, oral-motor exam, social/play and getting input from any daycare/preschool teachers. If the child is not yet talking and a possible candidate, we can also trial an assistive augmentative communication (AAC) device.

❑ **Supplementary Testing**: is for children who have previous speech-language, neuropsychological or similar reports/assessments within the past 9 months and whose parents would like additional information, such as aspects of auditory processing, a more-in depth expressive language component to what was already done or an AAC assessment and/or trial an AAC app with support and input from our staff. Fees are prorated by time spent at twice our therapy rate for a 45 minute session ($177x 2=$354 per testing session.)

THERAPY

If you have previously previous assessment reports:
New clients with previous assessments should expect that initially, at least 1 or 2 sessions will be spent on our staff obtaining updated/supplemental testing in order to develop appropriate treatment goals and to establish baselines for the skills we will be working on with your child. This provides us with necessary data with which we can measure future progress and also helps our staff pinpoint gaps in learning/skills and zero in on what your child needs. Assessment sessions are billed at twice the usual therapy fee for the time spent. You will be provided with the testing results and updated goals. *New clients with no prior assessment reports will need to start with a formal assessment.*

Individual Therapy

1. What kind of therapy would you like for your child?

❑ at the office ❑ teletherapy ❑ at my home

❑ at my child's preschool/daycare/private school (within 3 miles of our new office in San Jose)—mornings/1pm slots only—1 hour sessions only
School name/location: _____

❑ I'm flexible!

2. How many sessions per week do you wish to schedule? _____

3. How long for each session?

❑ *30-minute individual sessions, available before 2pm only **($118)** ****must schedule a minimum of 2 per week****

❑ 45-minute individual sessions **($177)**

❑ One hour at the office **($236)**

❑ One hour at your home or child's preschool/daycare or private school **($325)**

4. Do you have a preference for which speech pathologist works with your child?

_____

5. Intern Option: Would you be open to having your child work with a graduate student intern if we cannot place your child with one of our licensed speech pathologists? (Sessions for grad interns $150 per 45 minutes; $100 per 30 minutes.) We may or may not have an intern available for a given semester, but we often do!

You may always opt to be on a waitlist for a licensed SLP while your child is working with a graduate intern. (Children who work with our interns do get priority scheduling when an opening comes up.) Interns have already completed significant coursework at the master's level, receive ongoing extensive training with us, intensive supervision and ongoing support from our Director (Kristen) and Executive Director (Patti).

We only accept interns who have additional prior experience working with children, especially those with special needs. Interns are with us for either the spring semester (Jan-May) summer (May-August) or fall (Sept-Dec). Therefore, the interns rotate and there are several weeks between semesters where we will find alternative sessions for you, or you can wait until the next intern's semester begins.

***** A reminder that interns rotate each semester and there is no guarantee that you will be able to move to a permanent spot with a licensed SLP, although you can opt to be on the waitlist.**

____ Yes, I'll try it! (If for any reason you are not comfortable, we waive the 15-day notice to cancel)
_____ No thanks. I'll wait for an appointment with a licensed speech pathologist.

Group Therapy

(3-6 children) or "dyad" (Group of 2 children)

6. Are you interested in a social/play group for your child?

❑ Yes ❑No ❑ Maybe

Group of 2 (dyad) 45 minutes $160

Group Rates: (group of 3-6 children)
45 minute group: $126
60 minute group: $168
75 minute group: $210
90 minute group: $250

Groups are used to teach children how to understand and use language (verbal and body language) in an age-appropriate manner in a playful and fun environment with their peers. We work on helping children be less prompt-dependent, and "learn how to learn" from their peers, as well as the adults.

YOUR CHILD'S AVAILABILITY

7. *Days* your child is available *(please check all that apply):*

❑ Monday ❑ Tuesday ❑ Wednesday ❑ Thursday ❑ Friday

5. *Times* your child is available to START each session
(Please check all that apply):

❑ 8:15am to 10am

❑ 10am to 11:15am

❑ 1pm to 2pm

❑ 2pm to 3pm

***We are not accepting requests for appointments after 3pm at this time. Our waitlist is full with over 100 requests.*

HANEN PROGRAM FOR PARENTS (More Than Words®)
We offer a Hanen group parent coaching via Zoom classes conducted by Kristen White, our Director of Clinical Services. This program will be conducted on an individual basis rather than in a group setting. The More Than Words program is for parents who have children diagnosed with autism or other social communication difficulties. This program is for parents of children ages 18 months to 5 years old. The initial pre-program consultation with Kristen would be billed at our hourly rate ($236). This program provides concrete strategies to help you help your child learn to develop social communication skills which leads to increased communication overall. Personalized individual hour sessions will then be held via Zoom and your child should be present for all sessions. If you would like more information about this program, please indicate so here below. ❑ **I'm interested! Please send me more information about the Hanen More Than Words**

Please contact me to schedule an appointment for my child.

Signing below does not confirm a schedule or obligate you to a requested schedule. It is to get the ball rolling so we can see what we can offer, given your child's needs and availability. We will be in touch!
