

CAMPER VAN Shopping Toolkit & Worksheet

This worksheet and your toolkit should help you decide your criteria for selecting the best Camper Van for your style of RVing.

Review Scott's Sample Toolkit and Worksheet criteria. Then, determine your "tools" and criteria. Write the criteria on the blank lines of your worksheet. Assign points for each criteria and total possible points for the category.

Bring your "tools" and this worksheet to your Dealer. Place your "tools" as you would use them in the Camper Van. Score those criteria, and tally the score.

Rank the scores for the various Camper Vans you are considering.

This should help you determine if the floor plan and RV systems will deliver the van travel experience you desire.

Journey on!
