

Your Trusted Partner for
**Industrial Engineering
Solutions**

High-quality industrial solutions and technical services
"together" a force multiplier and "innovative" across all industries.

About Us

At **Dein Engg. LLP**, We specialize in providing high-quality industrial products and technical solutions. For diverse industries. With a strong focus on reliability, performance and customer satisfaction, We ensure that our products meet the highest standards of engineering and quality.

Our Product Range

■ Pipe Fittings & Flanges

We offer a comprehensive range of industrial pipe fittings in various sizes and high-quality materials including SS, MS, Brass, and PVC. Designed for superior strength, corrosion resistance, and long-term durability, our fittings deliver reliable performance across demanding industrial environments.

■ Couplings

Our rigid and flexible couplings are engineered with high-precision, torque-resistant designs for dependable performance. Ideal for pumps, motors, and machinery connections, they ensure smooth power transmission, reduced vibration, and long-lasting operational reliability.

Valve

We offer a complete range of Ball, Gate, Globe, Check, and Butterfly valves designed for precise and efficient flow control. Built to perform under demanding conditions, these valves are available in multiple pressure and temperature ratings, ensuring reliability, safety, and long service life.

Rotameters

Our flow measurement instruments deliver reliable performance with clear scale visibility for quick and accurate readings. Designed to suit a wide range of applications, they are available with custom measurement ranges for different fluids, ensuring precision and efficiency in every operation.

Sight Glass

Level Switches

We offer float type, capacitance, and electronic level switches engineered for precise liquid level detection and control. Ideal for tanks, reservoirs, and process equipment, these solutions ensure accurate monitoring, operational safety, and dependable performance in industrial environments.

Bearings

We provide a complete range of ball, roller, and thrust bearings engineered for high load-bearing capacity and precision performance. With a superior finish and robust design, our bearings ensure smooth operation, reduced wear, and long service life for demanding industrial applications.

Hydraulic Fittings

Hardware

We offer a comprehensive range of industrial fasteners, including nuts, bolts, clamps, and tools, built for strength and precision. Engineered for heavy-duty performance, our products are available in a wide selection of standard and customized sizes to meet diverse industrial requirements.

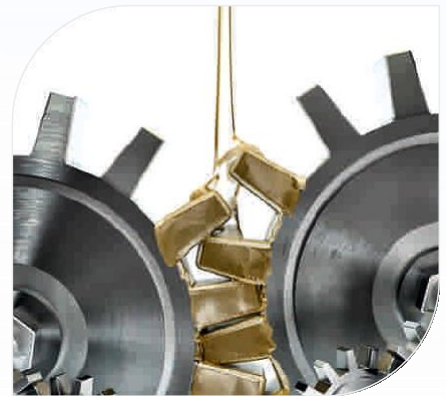

Oil & Lubricants

Our range of industrial lubricants, hydraulic oils, and greases is specially formulated to reduce friction and minimize wear. Designed to enhance efficiency and protect components, these solutions ensure smooth, reliable, and long-lasting machinery performance.

WTP/STP/ETP Equipments

Various equipments in WTP/STP/ETP such as submersible pumps, Tube Settlers for Solid Separation, MBBR for Aeration tanks etc including sales and servicing/Annual maintenance contracts.

■ Panels & Panel Services

We specialize in electrical control panel design and fabrication, delivering reliable and efficient solutions. From servicing, maintenance, and upgradation to fully customized panels for industrial automation, we ensure performance, safety, and seamless operations.

■ Pressure Gauges

Our high-accuracy pressure monitoring instruments deliver precise and dependable measurements across demanding applications. Suitable for low, medium, and high-pressure ranges, they are built to handle diverse industrial needs. With a robust, durable design, these instruments ensure consistent performance even in harsh industrial environments.

Pump Spares

We supply high-quality mechanical seals, impellers, shafts, and gaskets engineered for reliable performance. Fully compatible with leading pump brands, our spares ensure perfect fit and efficient operation. Designed for durability and precision, they help extend pump life and reduce maintenance downtime.

Why Choose Us?

High-quality & durable products

Competitive pricing

Customized technical solutions

Timely delivery & strong service support

Trusted by leading industries
