WATER TREATMENT SPECIALISTS

Hot Water and Chilled Water Loops

Why should you treat hot water and chilled water loops? This picture shows what can happen when there is not any water treatment for these systems. Corrosion, inefficiencies, longevity and sludge can all be problems that can occur if systems are not treated properly.

Photo taken at a site that has never been treated.

Benefits of Treatment

- Improve Efficiency
- Prevent Scale
- Prevent Corrosion
- Prevent Sludge from Deposits
- Reduce Energy Cost and Overworking Your System

How We Can Help

We service several hot water and chilled water loops in our area. We monitor them on a regular basis to ensure appropriate levels are maintained, advise of any issues and work together to help maintain efficiency for your facility.

Are you getting the most from your system?

Our Capabilities

- **Boiler Treatment**
- **Cooling Treatment**
- **Pre-Treatment**
- **Wastewater Treatment**
- **Green Chemistry**
- **E-Service Cloud Reporting**

Service Area

Environmental Water serves Ohio, Michigan and Indiana. We have sales and service representatives located throughout the area, so our customers can receive the best service possible.
