

## Project Experience

The client wanted to evaluate the integration of their solar power generation technology with water and desalination plants. They wanted understand the current power needs of typical water and desalination equipment in order to evaluate the possibility of providing solar power for existing and new facilities. Suggestion were provided for developing a market entry strategy for the proposed integration.

## Water Treatment **and** Renewable Energy

### STUDY CURRENT WATER TECHNOLOGY

The client wanted to study current water technologies available and typical power requirements for various equipment components

### IDENTIFY TECHNOLOGY INTEGRATION

Helped the client identify areas of potential technology application for water treatment equipment and solar power integration

### DEVELOP MARKET ENTRY STRATEGY

Provided the client with the most realistic and practical market entry strategy for their product due to our in-depth knowledge of the water treatment industry
