

# CENTERPRO SYSTEMS

**CUSTOM BUILDS**  
UL 508A | UL 891 | UL 1203  
UL 1741  
support | Quote-ready review

Centerpro Systems designs and manufactures custom electrical control panels and related electrical products, supporting customers with UL-focused project review, engineered solutions, lean manufacturing experience, turnkey execution, part sourcing, enclosures, back plates, nameplates, and product support.

## CORE CAPABILITIES

- UL 508A industrial control panels plus UL 891 and UL 1203 project support where applicable
- UL 1741 listed 1500V DC solar combiner configurations for renewable energy projects
- Engineering review and SolidWorks-based support where applicable
- Turnkey manufacturing, assembly, documentation support, and product support
- Part sourcing, component coordination, layout review, and manufacturability feedback
- Enclosures, back plates, engraved nameplates, and custom HDPE duct bank spacer cards

## TYPICAL PRODUCTS / SERVICE AREAS

- Industrial control panels
- PLC / machine controls
- Pump and motor controls
- Operator interface panels
- Solar combiners
- Met stations
- Network enclosures
- Back plates and nameplates

## BEST-FIT CUSTOMERS

- OEMs needing repeatable, buildable production panels
- Electrical contractors working against installation schedules
- Plant engineers and maintenance teams needing serviceable controls
- Solar EPCs, developers, distributors, and renewable-energy procurement teams

## BUILD / REVIEW SUPPORT

- Layout, component fit, and enclosure review before production
- Documentation, labeling, and repeat-order support for program work
- Lean manufacturing experience for schedule-sensitive builds

## SPECIFICATION SNAPSHOT

<b>Company</b>	Designer and manufacturer of custom electrical control panels and related electrical products
<b>UL focus</b>	UL 508A industrial control panels, UL 891 switchboard support, UL 1203 project support, and UL 1741 solar combiner configurations
<b>Experience</b>	30+ years of electrical industry experience referenced in current Centerpro materials
<b>Execution</b>	Project review, engineering input, sourcing, manufacturing, assembly, documentation, and support

## QUOTE-READY INFORMATION

- Drawings, sketches, schematics, or one-line diagrams
- Bill of materials and preferred component brands
- Voltage, phase, load, SCCR, current, UL 891 / UL 1203 scope, and ratings where known
- Enclosure size, NEMA/environment, mounting, entries, and space constraints
- Quantity, repeat-order expectations, project location, and required delivery date

## PROJECT REVIEW WORKFLOW

- Review application, drawings, and target product requirements
- Confirm enclosure, component, rating, labeling, and UL-scope assumptions
- Align BOM, alternates, sourcing, manufacturability, and schedule needs
- Quote, build, document, and support shipment or repeat production

## COMMON DELIVERABLES

- Custom panels, enclosures, back plates, nameplates, BOM coordination, and support documentation
