Copenhagen/ Malmö — August 26, 2025

Hymeth appoints Anders Johansson as new CEO following strategic investment

Hymeth ApS, a clean-tech frontrunner developing high-efficiency alkaline electrolyzers, is pleased to announce the appointment of Anders Johansson as Chief Executive Officer (CEO), effective September 8th.

Anders will be leading a steadily growing team consisting of several new key positions, including the soon to be announced Chief Technology Officer (CTO), who will work closely together with Anders to accelerate Hymeth´s delivery of cost-effective and energy efficient electrolysis technology. Tailored to serve the desired industrial decarbonisation in the Nordics and beyond.

Mr. Johansson has a robust industrial background and is passionate about driving growth. Anders brings extensive experience in pioneering strategic partnerships and accelerating the adoption of innovative technologies across global markets. With a proven track record in executive and operational leadership, from the transport and energy sector, he has successfully led multiple commercial launches and contributed to the scaling of high-impact ventures. His appointment marks a significant step forward in the company's mission to lead innovation in the hydrogen technology sector.

This leadership transition follows a strategic 3.7 M Euro investment in the spring when the majority of Hymeth´s owners, including a new lead investor Thisbe AB (a wholly owned subsidiary of FAM AB), showed its continued dedication to the commercialisation of Nordic efficient alkaline electrolyser technology.

"I am excited to join Hymeth at this pivotal stage," said Anders Johansson. "With strong dedication from the Board of Directors and a growing demand for market adapted hydrogen solutions, Hymeth is uniquely positioned. I look forward to working with our talented team to drive meaningful impact and sustainable growth."

On behalf of the Board the Chairman, Torkel Elgh, wants to extend a warm welcome to Anders and at the same time acknowledge the importance of the work that his predecessor Mr. Mats Blacker has done navigating Hymeth towards its current solid platform for continued growth. In closing Mr. Elgh emphasised *"With Johansson at the helm, Hymeth will continue to expand its technology platform and strengthening its partnerships, reinforcing the position as a key player in the global transition to sustainable energy."*

Anders Johansson, New CEO of Hymeth
