Hymeth appoints Theresa Falkendal as new Chief Technology Officer (CTO)

Hymeth, a clean-tech frontrunner developing high-efficiency alkaline electrolyzers, is pleased to announce the appointment of Theresa Falkendal as Chief Technology Officer.

Theresa joins Hymeth's executive leadership team to strengthen the company's technological edge and accelerate the deployment of industrial-scale hydrogen solutions. She will work closely with CEO Anders Johansson and the wider team to ensure Hymeth delivers on its mission of cost-effective and energy-efficient electrolysis technology, supporting the decarbonisation of industry in the Nordics and beyond.

Dr. Falkendal brings a strong combination of industrial, research, and leadership experience. Most recently, she served as Head of Innovation at Hydri Solutions, where she led strategic technology development for hydrogen production plants. Prior to that, as Head of Research and Development at Nilsson Energy, she spearheaded product development for hydrogen technology to advance clean energy solutions.

Her earlier academic career includes a PhD in Astrophysics from Sorbonne University and a postdoctoral position at the Potsdam Institute for Climate Impact Research. This diverse background underpins her ability to bridge science, technology, and business to deliver impactful innovation.

"Theresa's proven track record in hydrogen innovation and her ability to lead complex R&D efforts will be invaluable. With her appointment as CTO, Hymeth strengthens its position as a key player in the global transition to sustainable energy." said Anders Johansson, CEO Hymeth.

"I am excited to join Hymeth and contribute to the development of technology that supports the green transition in a meaningful way." said Theresa Falkendal. *"With Hymeth's dedicated team and strong partnerships, we're well positioned to develop solutions rooted in technical expertise, with a clear focus on making a lasting contribution to global sustainability."*

Theresa Falkendal, New CTO of Hymeth
