

Top Lix No.1

Horse Mineral, Vitamin & Protein Lick block

Top Lix No.1 is a highly mineralised horse specific lick block designed to provide all the essential nutrients a horse needs in the ease-of-delivery method of a lick block and the horses like the taste too!

Most horse lick blocks provide the minimum amount of minerals and, often, no vitamins at all. Top Lix No.1 provides possibly the highest levels of minerals, vitamins and key amino acids ever found in a lick block, all designed to meet the daily needs of the paddocked horse.

Top Lix No.1 not only contains possibly the highest combination of Copper, Zinc and Manganese ever delivered in a lick block, it also contains good levels of Calcium, Phosphorous, Magnesium, Selenium, Iodine, Chromium, Vitamin A, B & E, as well as key amino acids such as Lysine, Methionine & Leucine.

With less than 6% sugars and starch, Top Lix No.1 could possibly be the healthiest horse-specific lick block available today.

Top Lix is just that! A Top Lick, designed for horses by scientists & nutritionists who know and love horses.
