

Optimize Your Bottom Line using the Seattle Hill Ventures *Optimization Efficiency Score Assessment*

In September 2021, Seattle Hill Ventures (SHV) was established to help small and mid-sized businesses achieve their strategic objectives, growth, and earnings potential, and help our customers attain “best in class” satisfaction ratings.

SHV has a thesis that early stage and small to mid-sized businesses are too busy, or lack the capital, to take advantage of resources that can help assess their strategic and operating needs. For this reason, SHV developed a service that allows each customer to “hold a mirror” to their business by using our exclusive, proprietary, and completely confidential, *Optimization Efficiency Score (OES) Assessment* tool. ***For a comparison of the various OES services, please refer to the chart below.***

The *OES Assessment* is a straightforward process that begins with a structured interview, completed confidentially, by the customer. Responses are used to generate results using *OES Assessment* algorithms and are compared against normative data from up to 4.9 million companies across 190 industries.

SVH is excited about the opportunity to help small and mid-sized businesses become more efficient and effective and to help them optimize their bottom line.

If you would like to learn more about Seattle Hill Ventures and the *Optimization Efficiency Score Assessment* process, please reach out to us by using the link in the “Contact Us” section.
