Our 2024 dates are almost complete, however we do still have limited availability, so if you're thinking of incorporating a content creator get in touch so we can check our availability!

Full weekends are even more limited. So again if you're interested in working with Reel Love for your special day, drop us an email with your dates asap!

How Reel Love works....

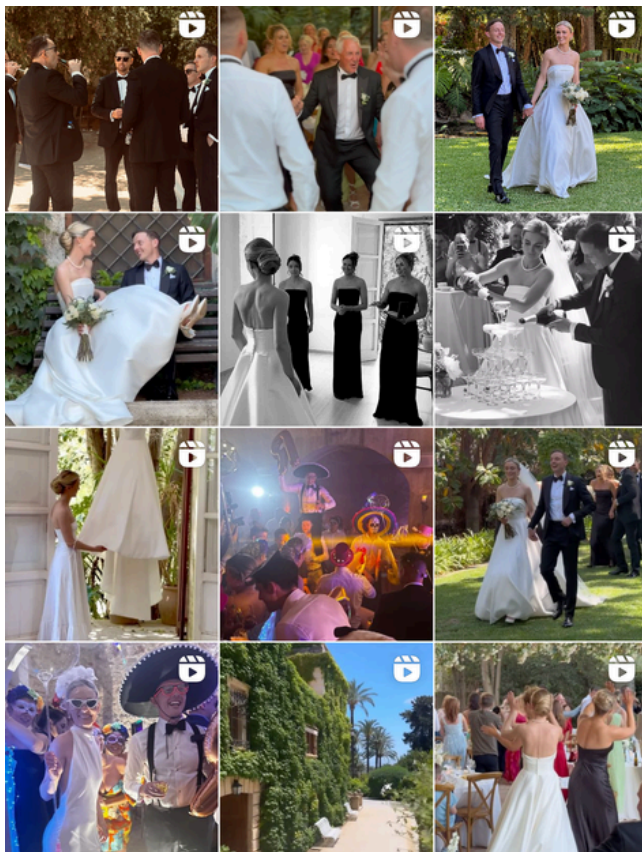

Firstly, we ask all couples to fill out a detailed questionnaire leading up to the wedding. We discuss everything from important moments of the day down to specific examples of reels or TikToks you love. This helps us identify what is important to the bride & groom and what to focus on when capturing your content on the wedding day.

Couples can book packages of varying time frames (four, six to over eight hours on-site) and add services like real-time Instagram story takeovers, pre-planned reels or TikToks, and more.

For a single-day wedding, Reel Love delivers hundreds of images and videos in real-time in a shared folder, meaning couples can access all the raw content by the time they wake up.

It's not just for the bride & groom; vendors are also bringing on creators. From a vendor's point of view, it's nice to have more social media-friendly assets to leverage from a marketing perspective, providing a realistic viewpoint of the event as it unfolds.
