

22-FOOT AIRSTREAM FLYING CLOUD

The Flying Cloud is a direct descendant of the very first Airstream built in 1932. It has the same all-aluminum, all-metal, all-riveted lifetime construction, but with many improvements incorporated through years of travel testing. This great Airstream with millions of miles of ancestry behind it, is the last word in deluxe travel and a genuine "Fifth Avenue on Wheels". It is spacious enough for comfort, but still compact and feather light. It sails along like the breeze behind your car.

Owners tell us "We take practically all the hills in high." Dollies are unknown to it and overload springs seldom used. Big windows fore and aft make for clear vision while traveling.

\$3695

Mattresses Solid 4 1/2" Goodyear Flat
 Pored "Airfoam" in Colorful Ticking
 Replaces Box Springs.
