

ALS EVENTSHIELD

Heavy Duty Temporary Steel Panel Fencing

ALS Eventshield Steel Fencing System is ideal to deliver medium to high security for site perimeters, privacy, secure storage, and holding areas.

Eventshield Fencing System comprises:-

Steel Panels: 2.4 x 3.4 and 3.4 x 2.4 metres, suitable for providing medium to high security for site perimeters and secure areas.

Struts and pins anchor panels to the ground.

Ballast Systems are used where ground pinning is not possible for example on hard standings or where there are shallow services.

Overhang Panels: fitted at the top of 3.4m panels to increase height for extra security.

Gates: a range of sizes available to create secure entrances for heavy plant, cars, and pedestrians.

Timber Clad Panels: 3.4m x 2.4m can create an aesthetically pleasing look while maintaining crowd safety and privacy.

Our experienced crews are highly skilled in the rapid, safe, deployment and removal of our Eventshield Fencing products.
