

CleanGreen

Commercial, Industrial, & Wastewater Cleaner

Principal Functioning Agent:

Adjuvant

(Fatty acids, C8-18 and C18-unsatd., sodium salts)

General Use Directions

Formula 144 is a 100% biodegradable, non-ionic surfactant designed to clean commercial spaces, amenities, food processing and industrial facilities, sewer drain/grates, wastewater grease, and many more. It does this by effectively dissolving oils, waxes, and grease build-up which naturally occurs from usage.

Nonfood Compounds
A8, L1

Recommended Application Rates

Commercial & Industrial Cleaning

Formula 144 should be used at a 4:1 ratio for food degreasing and general industrial cleaning, and a 3:1 for engine degreasing and tougher build-up, or for substances such as hydraulic fluid, 80/90 oil, or rubber skid marks.

Formula 144 can be applied by hand through a spray bottle, pump sprayer, hose attachment, pressure washer, or as a wash dip. Mix desired ratio solution and spray on with a foaming tip. Let sit for 10 or 15 minutes and rinse with potable water. Objects can also be soaked in the mixed solution.

Wastewater Tanks, Septic Lagoons, & Sewer Drains/Grates

Formula 144 should be used 1 gallon to every 100 gallons for initial grease or oil treatment, and then 1 gallon to every 1,000 gallons as a maintenance. Pour in tank/lagoon or pump through drain until grease is dissolved. Drain grate can be sprayed with foam as described above before rinsing.

Caution: Keep out of reach of children.

Formula 144 will not harm eyes, ears, respiratory system, or skin for short periods of time, and is safe if ingested in small quantities. Can be harmful if swallowed in large quantities or from prolonged exposure to skin or eyes. In case of eye contact, flush with plenty of water for at least 15 minutes. If ingested in large quantities, consult a physician.

Gallons: _____ Net Weight: 8.4 lb. per gallon
