

PLANET WASH

Bioremediation Surfactant

Dissolves Oils & Biohazards—Keeps Environment Safe

Our specialized **Planet Wash** is a powerful, chemical-free surfactant that has almost unlimited uses when it comes to cleaning oil spills and biohazards. Below is a small sample of what Planet Wash can be used for:

- **Ocean Cleansing**
- **Wildlife Cleansing**
- **Shoreline Wash**
- **Vehicle/Boat Wash**
- **Soil Amendment**
- **Tar Removal**
- **Industrial Cleaning**
- **Waste Water Treatment**

Planet Wash is a new breed of product that is 100% carcinogen free and works hand in hand with mother nature to help maintain a clean, healthy planet. Our product is colloidal micelle technology derived from organic material which molecularly breaks down the oil contaminates to nitrates, carbon dioxide, oxygen, and H₂O while at the same time biodegrading along with the biohazard.

Planet Wash can be instrumental in rescuing and preserving land, sea, and animals across the globe from various industrial accidents, natural catastrophes, and man-caused disasters. Call us today and let **Planet Wash** work for you!
