

CleanGreen®

Recommended Application Rates

Planet Wash should be used between a 1:1 ratio and a 10:1 ratio for cleaning oil spills depending on thickness of oil layer.

Product can be applied by hand, through a hand sprayer, pump sprayer, or hose attachment.

Spray Planet Wash solution onto biohazard and let sit so that micelles can begin break-down process. Repeat as necessary until biohazard is dissolved and cleaned completely.

Principal Functioning Agent:

Soap (the water soluble sodium or potassium salts of fatty acids produced by either the saponification of fats and oils, or the neutralization of fatty acid).

*Bacteria speed up break-down when moisture levels are 23% and higher. CleanGreen® TerraMax can be used to increase bacteria activity and speed up bioremediation.

Caution: Keep out of reach of children.

Harmful if swallowed. If ingested, consult a physician. Avoid prolonged contact with skin. In case of eye contact, flush with plenty of water for at least 15 minutes.

General Use Directions

Planet Wash is a 100% biodegradable, non-ionic surfactant designed for bioremediation to break down oils, waxes, and grease found in biohazards. It is used to clean oil spills on both soil and ocean water. It is currently on the NCP Product Schedule through the EPA (or, "Products Available for Use During an Oil Spill").

Gallons: _____ Net Weight: 8.75 lb. per gallon
