

Marine & Oil Remediation Surfactant

Principal Functioning Agent:

Soap (the water soluble sodium or potassium salts of fatty acids produced by either the saponification of fats and oils, or the neutralization of fatty acid).

General Use Directions

Planet Wash is a 100% biodegradable, non-ionic surfactant designed for marine industrial cleaning and the remediation of oils, waxes, and grease found in petroleum-contaminated environments. It is used to clean vessels, harbors, shorelines, oil spills on soil, and oils/grease from water. It is currently on the NCP Product Schedule, Subpart J, through the EPA.

Recommended Application Rates

Planet Wash should be used from a 4:1 ratio to a 50/50 solution for basic industrial cleaning or oil spill cleaning depending on the situation.

For soil remediation:

Best used before applying CleanGreen® TerraMax. 50/50 solution can be applied by through a pump sprayer, hose attachment, or pressure washer.

For boat, marina, or deck cleaning:

Mix 4:1 solution and spray on with a foaming tip. Let sit for 10 or 15 minutes. If cleaning need is extreme, scrub to agitate. Rinse with water. Repeat as necessary until cleaning need is accomplished.

Caution: Keep out of reach of children.

Planet Wash will not harm eyes, ears, respiratory system, or skin for short periods of time, and is safe if ingested in small quantities. Can be harmful if swallowed in large quantities or from prolonged exposure to skin or eyes. In case of eye contact, flush with plenty of water for at least 15 minutes. If ingested in large quantities, consult a physician.

Gallons: _____ Net Weight: 8.75 lb. per gallon
