

# CleanGreen®

# TerraMax

## 12% Humic Acids

(humic acids percentage claimed is based on an average. Levels may be slightly more or less.)  
Derived from Potassium Humate

## General Use Directions

TerraMax is a concentrated complex of humic acids, cultured soil bacteria, and trace minerals which is used for digesting biohazards, waste, oils, and grease while also restoring soils to their most fertile state

## Recommended Application Rates

### For Waste, Bloods, and Greases:

Apply directly on the soil at a rate of 1-2 gallons per acre. TerraMax microbes will digest the leftover biomass until hazard consumes.

### For Oil Spills:

Best used after applying CleanGreen® Planet Wash surfactant and letting micelles break down the oil first. TerraMax microbes will digest the leftover biomass until hazard consumes.

### **Caution: Keep out of reach of children.**

**Harmful if swallowed. If ingested, consult a physician. Avoid prolonged contact with skin. In case of eye contact, flush with plenty of water for at least 15 minutes.**

Gallons: \_\_\_\_\_ Net Weight: 9 lb. per gallon
