Proteus MMX

With more than 30 years in the Computerized Maintenance Management Systems (CMMS) industry, our software is ideal for managing the maintenance needs of intelligent buildings, facilities and manufacturing plants alike. Maintenance professionals rely on Proteus for its simplicity, reliability, scalability and multilingual capability.

Eagle Technology solutions are highly scalable, making them accessible to any size of organizations. Its products are used in a number of industries worldwide, including airports, hospitality, education, healthcare, food and beverage and more.

Proteus offers comprehensive solutions that centralize asset management, maintenance management, inventory control, work order management and reporting into a single, integrated solution.

Proteus MMX offers easy integration with Building Automation Systems, Analytics software and Graphics software packages to make a truly SMART building. Proteus MMX is highly configurable, providing you with the power to increase productivity, improve maintenance, meet regulatory issues (FDA, CFR 21,,Part11), reduce energy usage and support sustainability initiatives. It also meets the needs for Industry 4.0 initiative in Europe.

Features

Benefits

-Reduces downtime
-Real time data available for managerial decisions
-Record of standardized maintenance and asset history
-Optimizes use of labor
-Affordable and easy to use
-Accurate budget data
-Planned maintenance vs. demand maintenance
-Asset history, warranty info, etc. available
  at the click of a button
-Improves risk management
-Supports sustainability initiative

About Us

Eagle Technology, Inc. has been a leader in development and sale of Enterprise Asset Management (EAM) and Computerized Maintenance Management Systems (CMMS) since 1986. With over 3,000 users in 34 countries, Eagle has developed partnerships around the world with companies such as: Johnson Controls, Honeywell, Delta Controls and Trane to serve their clients worldwide.

Eagle Technology is committed to providing world-class service, solutions and support to our customers, prospects and re-sellers. Founded by Harshad Shah, Eagle increases clients'efficiency by helping maintenance operations run smoothly and comfortably. Eagle Technology provides software and implementation services to help better serve your clients. Our expertise helps you, our client, to meet your goals. Our clients get maximum benefit from the software to meet their short and long term goals. At Eagle, the focus is on your success.

Eagle Technology serves the needs of a wide range of facilities and industries. We currently have clients in Europe, China, Mexico, Canada, India, Middle East, South America and Africa. We welcome the opportunity to discuss a partnership which would enhance your organization's business opportunities. Eagle has been a global presence for over 30 years. Translated into many languages and currencies, our goal is representation in every major marketplace in the world.

Proteus MMX Mobile

Proteus MMX Mobile allows technicians to update work orders, asset information and other data via smart phone or tablet. By staying out in the field with their Mobile CMMS, technicians can spend more time maintaining equipment and completing work orders without having to travel back to their computer. Productivity will never be higher since data can be accessed wherever technicians are; 24/7.

Proteus MMX Mobile can be implemented in a fraction of the time and is the perfect tool for field technicians, campus maintenance staff and mobile users around the facility.

Proteus MMX Mobile is available as an add-on module for Proteus MMX. It runs on smart phones and tablets running the Android, iOS operating system or Windows 10. The app is available to download in the Android Marketplace and the Apple Store.

Proteus MMX Modules

Proteus MMX can be expanded to meet your unique needs:

-Service Requests
-Barcode
-Inspection
-Audit Trail
-Warehousing

SMART Buildings & SMART Factories

Make your SMART buildings and factories even "smarter" by integrating your CMMS with your existing automation software. Proteus integrates with numerous systems including those from Tridium, Honeywell, Trane, Johnson Controls, Siemens, Schneider and many more! By offering a seamless integration to Building Automation Systems (BAS) and Manufacturing Execution Systems (MES), Eagle's Proteus CMMS enables you to move toward a safer and smarter environment.
