Security Risk Analysis

HIPAA law (HITECH) requires that health care providers protect ePHI data. But intruders, hackers and thieves are devising various ways to steal valuable data in all sorts of ways. Don't risk having a breach! You could receive heavy fines, up to \$50,000 per violation.

If you're a covered entity (CE), the Department of Health and Human Services (HHS) Office of Civil Rights (OCR) under the HIPAA Security Rule guidelines require that you can show evidence you've performed a Security Risk Analysis (SRA) and can 'attest' that you're protecting ePHI and preventing unauthorized physical and technical access to these records. Performing a periodic SRA on your systems and network is the best way to avoid theft, fines and long term damage to your business and your reputation.

CSM Hosting can help. Just pick one of our SECURITY RISK ANALYSIS options.

Get peace-of-mind knowing that you're doing everything reasonable and appropriate needed to reduce risk and protect your ePHI.

Here's just some of what we do.

- Inspect your network and all the connected devices
- Provide proof that you are protecting sensitive data
- Assist in taking necessary steps to improve your security and access of ePHI.

A Security Risk Analysis (SRA) is required and you could get audited. It's just that critical. **Why take the risk?**

The deadline is **December 31, 2017!**

<p>CSM Hosting delivers crucial capabilities your SRA needs.</p>	<p>CLOUD BASED NOTHING TO INSTALL</p>	<p>EXPERT ADVICE from CERTIFIED ENGINEERS</p>	<p>TARGETED AND METHODOLOGICAL ANALYSIS</p>

SECURITY RISK ANALYSIS | Solutions

Fits any sized business and all types of requirements and budgets

Features	Low	Guarded	Elevated	High	Severe
Vulnerability scan of network	✓	✓	✓	✓	✓
Project Manager		✓	✓	✓	✓
Systems Vulnerability Report and Score	✓	✓	✓	✓	✓
Attestation Certificate	✓	✓	✓	✓	✓
Scan Documentation	✓	✓	✓	✓	✓
List of addressable fixes to prevent a data breach		✓	✓	✓	✓
Security Expert Consulting		Available	Available	✓	✓
One time Scan	✓	✓			
Before & After Scan*		✓	✓	✓	✓
Quarterly Scanning			✓	✓	✓
Monthly Before & After Scan				✓	✓
Unscheduled random, unplanned scan					✓
Remediation—remote support to assist with 'fixes' on your systems*			Available	Available	✓
Price	\$1495	\$1995	\$3995	\$6995	\$8,995

Prices are subject to change. Scan limited to <50 IP devices. Add \$500 for each additional 50 IP address and or devices found in scan.

Any SRA scan is just one element in a comprehensive Security Management practice to protect ePHI. Providers, administrators and owners should consult the Department of Health and Human Services (HHS), Office of Civil Rights (OCR) for additional updates on HIPAA compliance and other requirements.

*Since some 'fixes' to a IT system require sensitive access, reboots, planning and coordination in order to resolve an eminent threat, CSM Hosting professional services can only work with experienced, staffed IT personal.
