

It's more than compliance It's about protecting your data

Corporate Software Management is your partner in protecting your data against the never-ending threats that exist in today's environment. Today, more than ever, we are faced with relentless attacks, threats, disruptions and unauthorized attempts to covertly access our data. The threat of DDoS, ransomware or other malicious cyber-attacks could be devastating, embarrassing and very costly.

CSM provides security consulting services and solutions that help organizations minimize their security risk profile, meet regulatory compliance demands and protect their information systems and data. We are experts in cybersecurity with years of experience and the certifications to back it. We become your trusted security advisor.

IT Managed Services and Secure Cloud Consulting Services

Why Choose CSM?

A team with experience

We understand today's evolving technical landscape, and the rapidly increasing security threats that exist both internal and external. The need to minimize risks, improve efficiencies and meet Governance and compliance regulations has never been more important. Our team leverages our extensive experience in developing, supporting and implementing processes and practices designed to minimize the risks to networks, computer programs and data from attacks, disruption and unauthorized access.

We strive to become a trusted advisor and valued extension of your organization. Our experience working with organizations from SMBs to large enterprise provides an un-paralleled understanding of the environment under which your organization must perform.

Cutting edge tools

CSM uses our extensive experience and advanced technology solutions to evaluate, analyze, and identify security challenges that exist for an organization's IT environments.

Once the security issues have been identified, CSM provides a portfolio of proven security technologies that can be implemented to resolve the security issues.

As leading experts in security, we provide the knowledge, processes, procedures, solutions and services that enable organizations to **generate positive results** based on their goals, requirements, and priorities.

The CSM difference

- Reduced organizational risk profile
- Compliance with federal and state regulations
- Improved security policies and procedures
- Heightened security awareness within your organization
- Optimized infrastructure and network performance
- Increased operational efficiencies
