

Posh Paws Mobile Spa

It is our experience that when a dog is shaved down, as it is referred to in the grooming profession, pre-existing problems appear. When a pet is matted, air cannot get through to the skin therefore causing the skin to become irritated and creates a greater chance of being nicked by the clippers. It is also our experience that when hair is shaved down it can sometimes not grow back or grow back differently or with patchiness. Also, having the hair shaved down removes the protective barrier that most dogs naturally have keeping their skin protected from the elements, insects, etc.

It is understood that there will be an additional charge for this service.

I, _____ hereby accept fully responsibility for the possible harm that may come to my pet upon stripping, clipping, and grooming on the below date and time at Posh Pets Mobile Spa.
