

Unlock Your Ideal Imaging Experience with Digital X-ray

Our continuous pursuit of excellence sets us apart. Why settle for anything less in digital x-ray technology? Count on our expertise and experience for reliable support.

17CE DR System

Traditional or Glassless Cesium DR Panels available in multiple sizes and multiple panel configurations. These DR Panels are the Best Value in Imaging, providing excellent image quality at a very low dose.

Vieworks DR System

A global frontrunner in digital x-ray technology, the Vieworks DR system stands out for its user-friendly and highly adaptable acquisition software, along with its robust design, making it a smart investment for any practice. Available in single and dual detector configurations, the Vieworks system enhances the efficiency of radiology rooms to the fullest extent.

Used X-ray Units

For those start ups that need to watch their budget, we offer used equipment to get your practice up and running while staying in your budget.

Control & Tube Upgrades

A Control and Tube upgrade is a perfect way to modernize your x-ray department to give you better imaging results. This would also include high tension cables.

New High frequency X-ray Units

Choose the top line of x-ray generators regardless of the volume. Opt for the high frequency generators for high-quality imaging and years of trouble-free performance. Brands like Americomp and Bennet have a long history of delivering high-quality imaging solutions.

Upper Cervical Specific

If you require equipment specific to upper cervical care (such as NuCCA, Blair, A.O.), we offer a variety of alignment accessories for x-ray equipment, such as x-ray chairs, head clamps, double L frames, and more.

110 Volt X-ray Generators

Full Power High Frequency Generators for the facility that does not have 220 Volt power available.
