AVIUS AIR DELIVERY™ is the world’s most efficient standoff delivery platform, safely transporting critically-needed cargo anywhere in the world—whenever and wherever it’s needed.

Delivering critical, lifesaving supplies to the world’s most remote, vulnerable regions.

MERCY-SERIES
HUMANITARIAN RELIEF GLIDER / DISPOSABLE / AUTONOMOUS

IMMEDIATE AIR RESPONSE
YATES ELECTROSPACE CORPORATION / WORLD LEADERS IN UNMANNED CARGO DELIVERY SOLUTIONS
YATESSELECTROSPACE.COM
AVIUS AIR DELIVERY™ Mercy-Series tandem-wing, air-dropped, heavy payload, autonomous UAS gliders are designed and built in the United States by Yates Electrospace Corporation to assist the International Community following natural disasters such as earthquakes, hurricanes and floods as well as during complex humanitarian emergencies such as the 2014 West African Ebola crisis.

As international aid agencies and governments mobilize to respond to these crises, the remoteness of rural areas impacted, crippled transportation networks, and the loss of power in affected regions make it difficult to distribute much-needed supplies in the early and most critical stages of the relief effort, undoubtedly contributing to elevated death toll and unnecessary suffering.

AVIUS Air Delivery provides an immediate response platform for medicine, protective gear and re-hydration fluids anywhere in the world—and when the need is most crucial.

AVIUS Air Delivery Mercy-Series cargo units can be deployed out of Cessna Caravan style transport and utility planes, making distribution of supplies more affordable and timely than relying on government or military aircraft.
