GC Valves, LLC. manufactures an extensive line of rugged and reliable solenoid valves that range from simple on-off valves to entire flow control assemblies. More than 35,000 variations are designed for air and other gases, water, drinking water, hot water, steam, chemicals, cryogenic fluids, oils, vacuum and more.

Our catalog is just the starting point. If you need a minor modification or a complete flow control system, GC Valves can do it.

With the recent consolidation of Components for Automation products into the GC Valves family, we now build all our products at our expanded Charlotte, North Carolina facility.
