Slushy Machine Quick Start Guide

Setup

- Plug into a standard 10amp power outlet
- Place on a flat, stable surface
- Ensure there is space around the machine for airflow
- Avoid using extension leads where possible

Filling the Machine

- Fill with pre-mixed slush syrup and water
- Do not overfill the tanks
- Secure the lid before turning on

How to Start

1. Turn on main power
2. Turn on mixing (beater)
3. Turn on freeze mode

Important: The mixing function must be on for the machine to freeze properly

Freezing Time

- Slush typically takes 60–120 minutes to fully freeze
- Freezing time may vary depending on:
 - Weather temperature
 - Liquid temperature
 - Sugar content

Adjusting Consistency

- Use the control dial to adjust thickness
- Lower temperature = thicker slush
- Higher temperature = more liquid consistency

Cleaning

- Empty any remaining contents after use
- Rinse tanks with warm water
- No harsh chemicals required

Full cleaning is completed by Piece Of Cake Events after collection

Delivery & Collection

- Delivery is charged per booking, not per machine
- Machines are delivered and collected from one ground-level location
- Please ensure clear access at your event location

Important Information

- Keep machine upright at all times
- Do not turn off mixing while in freeze mode
- Do not move the machine once filled
- For any assistance, contact Piece Of Cake Events

We're here to make your event easy, fun and stress-free!
