

Superb Precision. Better Quality. Top Value. REGISTAR series

By using the **REGISTAR series TY-800** automatic register punch and plate bending system, your skilled press operator does not need to worry about unit-to-unit nor about axial (cocking) register problems.

Standard System Features:

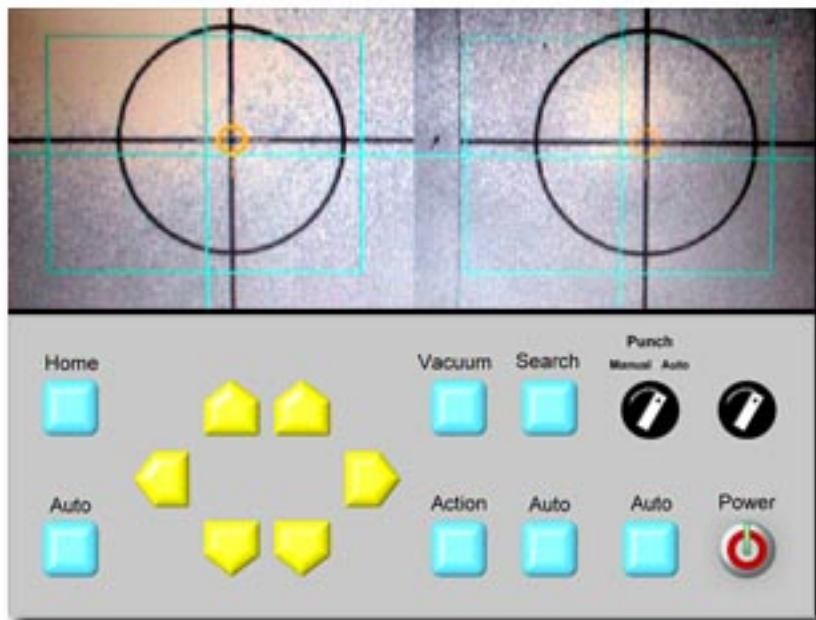

- Integrated computer control system for error free register to plate cylinder pins positioning and error-free plate bending.
- CCD camera for automatic register positioning.
- Print register marks are magnified significantly for easy visual inspection.
- Vacuum system to secure plate in position for punching and bending.
- Pneumatic system for plate punching and bending.
- User-friendly touch screen interactive monitor display and controls.
- Can customize electrical equipment to your local specifications.

Upgrade Option:

- Online Version

REGISTAR series TY-800 is specially designed for use with all makes of web offset presses including Goss, MAN-Roland, KBA, Heidelberg, Mitsubishi, Komori, Toshiba, TKS and many others
