

Counterintelligence and Compliance Case Management System

Developed by counterintelligence experts, 351X empowers Facility Security Officers, Executive Protection teams, Compliance professionals, and Corporate Security leaders to tackle evolving security challenges with precision. Engineered to streamline Employee Reporting, 351X proactively identifies emerging threats and risks while ensuring full compliance with the National Industrial Security Program Operating Manual (NISPOM) and Security Executive Agent Directive 3 (SEAD-3).

As the only platform designed to view threats through the lens of employee insights, 351X captures this critical, often-overlooked dataset to deliver unparalleled visibility. By integrating with cybersecurity tools, Open Source Intelligence (OSINT), and liaison networks, 351X enables security professionals to uncover actionable intelligence, neutralize risks before they materialize, and strengthen organizational resilience.
