351X

by IXN Technologies

Industrial Security & CI Case Management Tool

Security meets Compliance meets Counterintelligence

Developed by Counterintelligence experts and industry-leading Facility Security Officers (FSO), 351X empowers FSOs, Insider Threat Program Senior Officials (ITPSOs), Executive Protection Teams, and Corporate Security leaders to tackle evolving security challenges with precision. Engineered to streamline Employee Reporting and Personnel Security Management, 351X proactively identifies emerging threats and risks while ensuring full compliance with the National Industrial Security Program Operating Manual (NISPOM) Security Executive Agency Directive 3 (SEAD-3), and Foreign, Owned, Controlled, or Influenced (FOCI) requirements.

As the only platform designed to view vulnerabilities through the lens of employee insights and personnel security, 351X captures this critical, often-overlooked dataset to deliver unparalleled visibility. By integrating with cybersecurity tools and HR Information Systems, 351X enables a dynamic employee vulnerability score based on current data, enabling security professionals to uncover actionable intelligence, neutralize risks before they materialize, and strengthen organizational resilience.

Employee Reporting

- Foreign Travel/Debrief
- Suspicious Activity Reports
- Content Recommendations
- Foreign Contact Reports
- Self-Reported Items

Foreign Owned, Controlled or Influenced (FOCI) Compliance

- Track Parent Company Meetings
- Meetings Hours
