

IDENTIFY EXPLOIT NEUTRALIZE

IXN Solutions excels in delivering comprehensive counterintelligence and insider threat services across public, private, and government sectors. Our seasoned professionals specialize in designing customized solutions that empower clients to effectively achieve their missions, goals, and objectives.

Guided by a steadfast mission, we prioritize the protection, security, training, and empowerment of our clients within today's intricate and dynamically evolving security landscape. At IXN Solutions, we blend strategic foresight with practical expertise to navigate and mitigate the multifaceted challenges presented by an ever-changing threat landscape.

Our commitment is centered on delivering unmatched service and cultivating enduring partnerships founded on trust, reliability, and innovation.

NATIONAL DEFENSE SECTOR

PILLAR 1: COUNTERINTELLIGENCE SERVICES

Dedicated to providing tailored subject matter expertise to: full spectrum counterintelligence (CI) training, consulting, investigation, Supply Chain Risk Management (SCRM), and Threat Vulnerability Assessments (TVA). Our goal is to empower and equip clients with the assurance to navigate confidently in today's ever-evolving threat landscape.

PILLAR 2: TALENT MANAGEMENT

Our team has a deep history of recruiting and managing the careers of Department of Defense special program personnel. If your organization has a CI or CI-adjacent mission, we will find top talent to meet your contract personnel needs.

PILLAR 3: TECHNOLOGY SOLUTIONS

Our proprietary software solution, 351X, identifies individuals most vulnerable to security threats while ensuring compliance with NISPOM and SEAD-3 requirements, helping clients protect their equities. We've also partnered with IBM for Cyber Security solutions, Flashpoint and Logically.AI for OSINT solutions, and Prembly for identity verification and fraud prevention solutions. Need a technological solution? Let us help!

COMMERCIAL OFFERINGS

PILLAR 1: RISK MANAGEMENT AND COMPLIANCE

We employ sophisticated methods, policies, and enhancements to anticipate and reduce insider risks, particularly focusing on data leaks and sabotage, with an emphasis on NISPOM and other regulatory compliance standards.

PILLAR 2: OPERATIONAL EFFICIENCY AND INTEGRATION

We leverage and integrate organic cybersecurity tooling for enhanced detection without increasing operational overhead.

PILLAR 3: PROACTIVE DEFENSE AND THREAT INTELL

By adopting CI tactics and methodologies, we look to move from a reactive state to a predictive state to prevent incidents from occurring, giving us a strategic advantage over traditional security measures. We focus on improving the four primary channels of reporting for Insider Risk professionals – Employee Reporting, Cybersecurity Alerts, OSINT, and Liaison.

PILLAR 4: CULTURAL AND HUMAN ELEMENTS

This includes comprehensive training, legal/human resources oversight and control, which fosters a culture of security, making every employee a guardian of our intellectual property, while respecting privacy laws and ethical standards.

PILLAR 5: ROI AND COST-BENEFIT ANALYSIS

The initial investment in our Insider Risk management program is offset by reduced risk of data breaches, lower insurance costs, compliance with government standards, and increased investor confidence, offering a ROI between 100-200% after two years
