

# OUR STEP-BY-STEP RESTORATION GUIDE

Estimates are based on the car's visible condition and your restoration preferences, whether full or partial. As many aspects of the car's condition remain concealed until paint and bodywork are removed, all work is performed on a time and materials basis. Estimates serve as guidelines, any changes or extra costs will be communicated and approved before proceeding.

## ESTIMATE & PLANNING

You may choose to source and supply your own specific car parts. If required, we are also available to assist in locating rare or hard-to-find components to ensure your restoration progresses smoothly.

## PARTS PURCHASING

Our paint shop carefully prepares, primes, and finishes each vehicle. We help with colour selection from original factory shades to custom designs like ghost stripes or pearlescent finishes to create the perfect look.

## SPRAY PAINTING

Before handover, each car undergoes a thorough final inspection to ensure every detail meets our high standards.

## FINAL INSPECTION

## DISCOVERY

We begin with a complimentary discussion to understand your goals, vision and budget. We'll inspect your car at our workshop or on-site if needed, then plan the best approach together.

## DISASSEMBLY & DOCUMENTATION

Your car is carefully disassembled. Every component is photographed, labelled, and catalogued, preserving a record of its journey and supporting accurate reassembly.

## FABRICATION

We strip existing paint and fillers to bare metal, then repair rust and structural issues using expert fabrication and metal shaping to meet factory standards.

## ELECTRICAL & REASSEMBLY

We reinstall every component with precision, restoring function, form, and originality or upgrading where customisation is requested.

## HANDOVER

This moment is all about you, the thrill of seeing your restored legend, crafted with passion and precision, ready to create unforgettable memories and become a proud part of your story.
