

OUR CAR RESTORATION GUIDE

Our estimates are based on the visible condition of your car and your chosen level of restoration, whether full or partial. Some issues may only become apparent once paint and bodywork are stripped back, so all work is carried out on a time-and-materials basis and should be treated as a guide only. Any changes or additional costs will always be discussed and approved with you before we proceed. At this stage, we can also help you decide on colour options, from original factory finishes to custom touches like ghost stripes or pearlescent effects, to ensure your restoration has the perfect final look.

You may choose to source and supply your own specific car parts. If required, we are also available to assist in locating rare or hard-to-find components to ensure your restoration progresses smoothly.

In our dedicated paint shop, every vehicle undergoes meticulous surface preparation, precise priming, and a flawless finish. From bare metal to show-stopping shine, we apply the same attention to detail and passion for perfection that sets our restorations apart.

Before handover, each car undergoes a thorough final inspection to ensure every detail meets our high standards.

HANDOVER

We begin with a complimentary discussion to understand your goals, vision and budget. We'll inspect your car at our workshop or on-site if needed, then plan the best approach together.

Your car is carefully disassembled. Every component is photographed, labelled, and catalogued, preserving a record of its journey and supporting accurate reassembly.

We strip existing paint and fillers to bare metal, then repair rust and structural issues using expert fabrication and metal shaping to meet factory standards.

We reinstall every component with precision, restoring function, form, and originality or upgrading where customisation is requested.

This moment is all about you, the thrill of seeing your restored legend, crafted with passion and precision, ready to create unforgettable memories and become a proud part of your story.
