

ACCURAY D30

Where can you find the quality,
the service, and the
performance for only \$9,995?

**The answer is simple,
only with the ACCURAY D30.**

The new **ACCURAY D30**, is a dual wavelength Class IV laser consisting of both 810 and 980 nm wavelengths. These two frequencies offer exceptional healing and pain control in one easy to use platform.

The **ACCURAY D30** is FDA cleared and has a learning curve that only takes minutes, not hours. There is no complicated internet tie in, or software that needs a continual upgrade to work.

Your ACCURAY D30 Includes:

- * ACCURAY D30 Base Unit & Emitter
- * 810 & 980 Wavelengths
- * ICE Software
- * Goggles (2 pair) & Stainless Case
- * Marketing Kit & Videos
- * Certification Course & Phone Consultation
- * Two year warranty

With the **ACCURAY D30** you will be able to quickly and easily accomplish the two main goals as to why we bring innovative technology to our practices:

1. To help our patients reach desired outcomes and alleviate pain.
2. To add a new revenue source.

ACCURAY D30 SPECIFICATIONS

Laser Type: Diode

Dual Wavelength: 980nm+810nm

Max Power: 30W

Spot Size: Φ 30mm

Working Mode: Pulsed or Continuous Wave (CW)

POWER

The Accuray D30 offers up to 30w of continuous power, 15w per wavelength. This makes the D30 one of the strongest lasers on the market, and the most cost effective per watt of power. Some lasers costing \$30,000 more than the D30 do not or cannot reach these power levels. It makes no sense to pay such high prices for therapeutic lasers that offer less power.

I.C.E. SOFTWARE

ACCURAY D30 comes with the fabulous new I.C.E. software, or Intelligent Computer Enhancement. I.C.E. software is a gigantic step forward in the way that therapeutic lasers function and treat. I.C.E. allows the laser to work more smoothly, quicker, and with a faster learning curve than nearly any laser on the market. Old laser operating systems are sorely outdated when being compared with I.C.E., and only found on the ACCURAY family of lasers.
