Section 5 Students' Comments

Please include your comments about the class discussions, readings, papers or projects, examinations or teaching style

- 1) Professor Ramirez is an incredible teacher who consistently keeps students engaged in both the material and the real-world applications of the material.
- 2) The quizzes and assignments coordinated with the lectures being taught and ensured that students understood the concepts being taught throughout the semester. In addition, the class examples allowed students to better understand concepts and aided in completing assignments.
- 3) The resources provided were very helpful, especially the videos for the power point presentations as they allowed for content to be easily reviewed. The games during class were also helpful and I wish there would have been more of them.
- 4) I wish there were a few more examples for some of the problems. Other than that, the class was fine and the professor did a great job. If I needed help, she was always available.
- 5) no comment
- 6) Here and there, there were a few tricky spots while learning certain topics. I have sincerely enjoyed Professor Ramirez. She is a gem to be around and has a warm personality and a funny laugh. Discussions over topics learned have been engaging. Projects, i.e. Excel problems have been helpful to my knowledge. Examinations and quizzes have been similar, not different. It is easy to study for both exams and quizzes and not feel lost along the way. Lectures have been organized and have shown excitement in the students' learning abilities.
- 7) Maybe explain more details, I think it is too hard to understand. I do not understand since the M. 5... But, overall, it is good.
- 8) Professor Ramirez is a fantastic professor. She covers the topics extensively and her teaching style makes the material easy to understand.
- 9) The teaching style is okay, but it is not very engaging as other students are often seen dozing off or doing other things such as other class' work, texting, etc. I appreciate the group projects as they are collaborative in an interactive way and help me stay on track with classes.
- 10) Great teacher. She obviously knows what she's talking about.
- 11) Professor goes beyond to make the student engaged and learn the material.
- 12) course content was helpful in completing exams.
- 13) You did a good job of bringing accounting into our everyday lives, the problems we were given were good because it was set up as if it was our actual job I feel.
- 14) Professor Ramirez is really excellent. She makes herself available and seems to want her students to succeed.
- 15) Straight forward and give resources to help ensure we understand.

- Mean 1 is the mean for this instructor for the question on the corresponding row.
