

# Carsis Consulting

Knowledge Partners  
for Social Change

Who we are  
Why we exist  
How we work  
What we offer

## Who we are

Carsis are a social purpose development consultancy with a vision to nurture resilient and thriving communities and to develop inclusive economies that address complex problems.

## Why we exist

Launched early 2022, Carsis Consulting was founded out of the experience that “business as usual” approaches to the COVID-19 pandemic were structurally unprepared to support the most vulnerable and need to change.

Our vision is driven by the desire to **redefine the rules of how we work** and the need to **build systems** that are resilient, equitable, and mutually reinforcing.

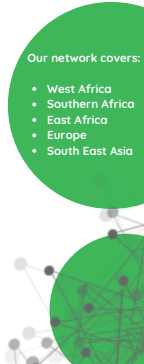

## How we work

Carsis work through the principle of **Impact Networks**: believing the resiliency of social, economic and environmental systems are only as strong as the capability and resources of the networks that connect them. We therefore work within and through existing communities, resources, and networks to build or “weave” capacity for systems change.

Through our international network of purpose-driven associates, **we partner and bring teams together to deliver lasting, positive change**. We partner with strategists, designers, researchers, subject matter experts and organisations to deliver impact and build capability for systems change.

We apply **systems thinking principles** to all our services. We deliberately seek to identify and understand the complexity of problems in order to design solutions that embrace the interconnectedness of our world.

### Our network covers:

- West Africa
  - Southern Africa
  - East Africa
  - Europe
  - South East Asia
- 

## What we offer

### We support

We work with organisations to understand their impact, and develop market-responsive social impact initiatives. We provide social impact and innovation services to SMEs, non-profits, foundations, large corporates, international organisations and multilaterals.

### Our Services

We build the teams to deliver social impact as a service. We specialise in developing **impact and innovation initiatives**, and provide the **learning and delivery services** to achieve it. We provide **Monitoring, Evaluation, Research and Learning (MERL) services**, **capacity building** and **training** to support organisations to integrate social impact throughout their work, as well as **programme management** for implementing it.

#### Consulting

- Social value and impact reviews
- Social impact strategy
- Capacity building
