
Use with Font: Euphemia CAS (Euphemia 2.9.2)

Š Ř Ŋ caps lock, right alt, shift
š ř ŋ caps lock, right alt
When Caps lock is off, you have a regular English Keyboard

The top row has the additional *Nattilik* sounds

ᓭ ᓯ ᓴ ᓱ ᓲ ᓗ · ᓕ ᓪ ᓐ = caps lock + right alt
ᓫ ᓰ ᓵ ᓲ ᓳ ᓘ ᓖ ᓫ ᓬ = caps lock + right alt + shift

The rest of the keyboard works almost the same as the ICI Inuktitut syllabic keyboard
Caps lock -lower syllabic of each key
Caps lock + shift -upper syllabic of each key

For dotted version of lower three rows:
*Caps lock + right alt -lower syllabic of each key
*Caps lock +right alt + shift -upper syllabic of each key

Nattilik Keyboard for PC
