CORRELATION BETWEEN UTILITIES AND THE 105 BODY RESETS

If we look at what is in utilities and what are 105 body resets there is a correlation that means the 105 body resets must be tuned first and also that they form part of the solution the burden of proof in the form of preventative rather than reversal. Now let's look at these Utilities in detail and I will list everything and present all utilities as codes and argue that that this is the main cure for death. Adjusting these will solve death and as such I davidgomadza is the only person on earth to claim that I have found the cure for death.

UTILITIES

dza.create.askya.ya(express)
notes
safes and vaults for sobertendergent as before but for sobertendergent
you must add isobergertyer to keep making it this isobergertyer is found only inside gods and
goddess and must be harvested every year up to 8 times first 8 months then break then start
again isobergertyer growing but now harvest only the last 8 months of the year then repeat
again

105 CRITICAL BODY RESETS

The body must reset after every activity so that it prepares itself to do the same task that means the body itself is a set of predefined tasks that must be completed so that the same task can be done over and over again this is the trick to living longer if all the resets are completed perfectly on time then the body will last longer

Now let's see the list of all reset switched in the body the body has 109 critical reset switches that must be reset for life to continue without any problems

Now let's write down the list

Ad2334 at the council Waaaaer asked what can be human then ats laughed and said humans will always be human and i can but then stopped and Waaaaaer realised that ats was refusing to fund his project despite agreeing to the plans then when Waaaaaer answered yes then sat down noting that ats was still refusing his arguments were simply to be funded we would what something in return then he said if you can then i can because all he was doing was asking not to be funded but for a loan that he would return with interest meaning not a handout hence when time comes he would payback so that they have no involvement or a say in the plans hence ats demanded Waaaaaer remove gurantees to live forever but ats insisted they ask the council and then check with Waaaaaer in private but he stood up angrily and said if i can you can and if they can then you can but meaning Waaaaaer was not expecting ats to refuse after all he is the one who had organised the job for him but ats worked for the council if the council knew then they would refuse the plans outright hence ats wanted 50% of the profit to approve but Waaaaaer was expecting 2% and that hit him hence he stood up angrily again and said if i can then can you meaning if he can make humans then he can make them too meaning fund the project as he had put him in that office ats then took Waaaaaers plan and changed 105 adjustments that restricted human growth and potential so that the plans can be cheaper to make but as it turns out Waaaaaer had already removed 109 adjustments on top of that to make the plans approved
