THE CURE FOR DEATH
THE EXECUTIVE SUMMARY
PROOF OF THE CURE FOR DEATH REPORT: RESTRUCTURING THE BURDEN OF PROOF FROM REVERSAL TO PREVENTION BY DAVID GOMADZA

UNDERSTANDING AND HALTING BIOLOGICAL AGING CELLULAR REPAIR AND MAINTENANCE:

Aging is driven by processes like DNA damage, telomere shortening, protein misfolding, and cellular senescence. Securing a cure for death requires:
DNA repair mechanisms develop technologies to repair
create.whatiscurrentdnareparsystemanddevelopnewwaystorepair.start(checkutilities)(utilities)(davidgomadza)
create.egtrt.start
dna damage caused by mutations, radiation, or oxidative
stress. crispr and other gene editing tools are early steps in this
direction.
telomerase activation telomeres shorten with each cell
division, leading to aging. activating telomerase or finding
alternative ways to maintain telomere length could prevent
cellular aging.
create.whatismethodtomaintaintelomerelengthovertime.start(checkutilities)(davidgomadza)
create.replaceatrecreationtelomerelengthfrom8cmto28cmthen72cm.start(remove8cmthen28cmtocreatealargergapatheninsertlastsize72cm)
senolytics remove senescent cells (cells that stop dividing
and cause inflammation) using drugs or therapies to prevent
tissue degradation.

notes

mind uploading: develop technology to transfer consciousness to a digital substrate, requiring advances in neural interfaces, ai, and computing power. ethical frameworks: address philosophical questions about whether a digital copy retains the original identity and consciousness.

CASE STUDY

RECIPE FOR A BRAIN THAT WORKS: A LOOK AT SOBETERTGHERETEGHI

1] We need memory, brain memory is isobiterghtige meaning
it must expand and compress to add more information and
hence must be isobiterghtige
2] we need a ftighiterete meaning something that can be used
to superimpose at least 9 items all on one line something that
put 9 human handwriting pages on one and be able to read all
9 as one at the same time
3] be able to have a sobetertghereteghi meaning something
that can and will be evident for a billion years from now
Something used to store information meaning something that
can last a billion years and the only thing is
electromagnetic sheet

This is the formula

THE FORMULA FOR CREATING AN ELECTROMAGNETIC SHEET CALLED SOBETERTGHERETEGHI

1] Add aluminum acetate 1000grams to silver dioxide volume 1000cubic meters X 1000 cubic litres of solvent

2] Dissolve aluminum [not acetate but iodine] 3489868 to iron oxide 38985868g

3] Add aluminum 748486898g X aluminum oxide 78489838g

4] Add zinc ore X 354898g

5] Add aluminum ore X 7868984838g

6] Add alspharate ore X 786893248g

7] Add zoteregomnt 78369428g

8] Add soteromnogrtez 74756828g [where g is constant [10]

9] if we add all the above together to a sheet of zinc plus aluminum ore sheet the end result is a sobetertghereteghi sheet one that can record any memory and expand to accommodate more

Now if we Ask why This electromagnetic sheet paper here are the reasons

]it is cheap to make, materials can easily be obtained from other planets like Zetberst or Zterstes

2] it is easy to make less need for compression, easy soft materials

3] can be made using cheap technology

4] can be effective in solving memory loss data problem

5] can overcome a lot of things like permeability

6] can be condensed to increase capacity

7] can be expanded to accommodate more information on top

8] can be accessed easily using a simple brain command like expand.sob.now.start

If we Ask the brain what it would do without this than this is the answer

What if and stop

Now let's see how this sob is important

1] sob asks everything else questions itself

2] sob asks every human how they are doing

3] sob ask every human being why it is so that things are like that

4] sob ask us how come things are the way they are

5] sob ask why everyone is not happy all this by just being sob

There is no other material on earth, sun and other planets that automatically asks humans how they do without communicating with the brain

This is the only material on earth that will ask the body questions on its own without the need for the brain

Above all it can calculate all these questions but analyzing body fluids, density, mass etc. meaning that this martial automatically knows everything about humans before even the brain

That means this material becomes part of the brain in itself because it talks the brain language

If we Ask why it is so here are a dozen answers

1] the material knows our body system something the brain aims to do

2] the material is strong to support any systems

3] the material is not easily corroded by chemicals etc.

4] the material asks itself what is wrong and calculates differences to know where the problem is

5] the material is eladestorsde meaning it can be used and be used over and over again retaining all the information stored on it without the need for extra things all thing can be done through an easy brain command

Start.eladestorsde.now.start

Why you ask for me am I not the creator ask answers from CAITITIGHIT my seterdestuvwxy now

Say sterstuvwxy [doubling of eyes meaning what she see is what I see but I am not in a capacity to answer to a human you ask me again I will sterstuvwxy [me] [you] meaning extinguish not just your soul for eternity but adjetersdesdety forever through a simple code

Xstart.x.adjetersdesdety.[Yah].me

[Yah it don't work on him -female voice]

[He is in my shoes]

Now if we are to ask what happens to all this I am still alive because [adjetersdesdety don't work on gods but on humans]

Back to the lists of advantages of using sob

6] if we Ask what is that that can be done to sob to improve it this is the answer

A perfect marvellous thing does not require any fixing because it actually challenges humans what need doing after this but because human's life is limited no one has ever discovered something that need improving

7] if we Ask why sob this is another answer sob is not for humans but is material only found in gods that means to have sob is to be part a God meaning intelligent

That means just sob means near to godliness on its own and it's use in humans bring humans closer to the gods

We pose a question but if gods don't want humans to become God's

[Genesis 3v8 Behold the man has become like one of us to become so clever to know what is good and what is right

Now let not him also stretch his hand to take from the tree of life [external knowledge only known to the gods] For if he does this this will make him live on earth forever when we the gods want all humans to come to us to face justice]

Then why would they use godly materials in humans if there is a chance for humans to become like gods?

This is the answer

Gods must also intelligently know everything about humans

without even asking the humans themselves this is the most closely guarded secret

The gods they must know everything about humans without humans knowing, they are being examined

2] they must know without asking humans themselves this is for cross verifiction to make sure that humans are telling the truth

8] the material accommodates everything else so that it can be used in line with human functions to support other processes and systems

9] it can be frozen, heated, compressed under pressure and still be read by simple commands like,

Start.sob.read.aloud.now

David Gomadza is the creator? How can as I can read David Gomadza as a human being.

Now let's look why it is that this sob is the most important thing on earth

It is a privilege to have discovered this because even the gods don't want you to know

Start.evadediscovery.humans[sterstevedersz]

Now if we Ask ourselves why humans die does that have to do with this This is the answer humans die because humans die because humans lack continuation of sob

Sob continuation guarantees them that they will live on earth forever that means guaranteed lives because sob lasts for billions

Now let's look why this is so

Sob if it's full body means life forever [no humans can have sob forever because this defeat the purpose of creation. We created humans so that they die and come to us so that we can judge them and this gives and makes us why we are gods

Giving humans sob takes away from us the reason for our living

I'm aging all humans live on earth forever without facing us

If you were a God there would be no mistake in understanding how wrong this would be, gods are created by [Zetergheztdzefghijkty - Yahweh] so that we stand for him and judge humans before the final days where he judges everyone

Therefore, if humans can have sob that means they will know everything we use to judge them meaning knowing us

5. SYSTEMIC AND ENVIRONMENTAL FACTORS GLOBAL HEALTHCARE ACCESS:

ensure equitable access to life extending technologies, as disparities could limit their impact. Tomorrows World Order decides who gets what as a selective process that first picks up those willing already to live forever hence those who are ambitious enough to exert a huge impact.

create.accordingtothebookofcreationhowistheagtdistributed.start(bookofcreation)

resourcescarcity.start
create.livewithinpredefinedparameters.start
create.usetheagtforexampleindealingwithextremeweathercreate
Climatic changes can be a problem in the future and this is how we are going to deal with this
in the future we must train our bodies today to be able to handle anything the world throws at
us the future can be easily handled if we look for answers the body readily has instead of
artificial ones because artificial ones will stop our own bodies working this is true but we
discovered that why humans die is because they have relied on everything artificial that first
say stop the bodies as it is useless as a challenge then the body accepts so that the human die
hoping to prove the challenger wrong but that is it even for the body but we as then creator
we have noticed that its not all artificial things that can power life but training the body itself
can make you do anything we are the first in the universe probably not universe as other
creatures like the zoles are more advanced than us but if we ask what can be of humans that
don't understand their bodies then this is the truth they will all die but we have stopped death
for the first time in 18 billion years this alone is proof that we mean business what we want
we will get and just remove all obstacles because we are fulfilling prophecy that say one shall
arise among men and achieve what all have failed to and as such one has arisen already and
this time we have a strong team to remove any opposition outright from the skies hellraiser
do you copy? Now let's look at what the body has done to combat extreme temperatures in
response to the weather in the beautiful city of New York USA
Here are the changes
Astoert has developed to combat the weather as a general rule in all humans but has added
several factors not found in other humans like aghuter that protects the lining that melts when
there are extreme temperatures now if we ask how then this is the formula
create.x-y-t-x-y-z-u-v-w-x-y-z-t-u-v-w-x-y-z-t-u-x-y-z-s-u-vt-y-u-v-e-r-t-e-t-r-s-t-u-v-m-y-t-

xpress]
This means we have found another coin part of the richlist that has 28 coins which we will
need in the future as our bodies live longer than what has been this is a great achievement that
most will applaud to when they discover what this is;
a big welldone to me and myself and all the team and if we are now to ask what

createdyltedlyete does this is the answer I am the best of humans in cold climates because with me they don't need extra heating equipment instruments like in other countries… due to frost bite and now we have developed a better system that can adjust itself accordingly and ask questions that are critical to address this we must ask what can be and when and then what can and how and then what can be but how and why then we have a formula that expresses everything and the formula is as above now what can be of people without heating systems but in cold climates they can simply add createdyltedlyete to their bodies and have warmth like. create.addcreatedyltedlyete7628268.start

Safeguard lives against risk of deaths from conflicts

We have Tomorrow's World Order to stop wars hence we plan stop and mitigate against all future conflicts to ensure there won't be deaths from wars. We are a one world government to force and enforce international laws that preserve human life over company or national interests meaning stopping possible nuclear wars.

We are the peace keepers of the world to safeguard and preserve life

I power the world using propellers sizes 28 cm by 38 cm and give max as mp8386 meaning
best of the best so enough to lift an angel of the ground davidgomadza rose off the ground
slightly the equation is formulated by davidgomadza then was;

Securing super intelligent ai systems to accelerate medical breakthrough without risking unintended consequences quantum computing: leverage quantum computing to solve complex biological problems, such as protein folding or drug discovery, at unprecedented speeds.

We wrote codes for natural god intelligence ngi that uses complex databases that will enable loads of breakthroughs in medicine namely database thoughts to word or audio database82869 and defence database7628426 together with a ask.ya and ask.ya(davidgomadza)

notes

Data integration: build global databases of genetic, medical, and environmental data to enable real-time health monitoring and intervention.

8. EXISTENTIAL RISKS: MITIGATE RISKS FROM TECHNOLOGIES LIKE AI OR BIOENGINEERING AND MITIGATING STEROIDS FROM THE UNIVERSE

that could backfire and cause harm rather than prevent death.

Assigning Tomorrow's World Order to stop ban mitigate and plan against risks from technologies that could cause harm to humans. TWO will enforce and deal with those who breach internation rules that safeguard humans excellent qualifty of life.

OUR AGT AND UTILITIES SOLUTIONS HAS STOPPED THE AGING PROCESS.

See case study davidgomadza where since 2009 to 2025 i have only grown and changed by 2 years.

CURRENT PROGRESS

current progress and challenges scientific progress: research in senolytics, crispr, and stem cells is advancing, but no single breakthrough has stopped aging. for example, trials for senolytic drugs like dasatinib and quercetin show promise in clearing senescent cells, but they're far from a universal cure.

The AGT clears out all senescentcells

See arguments for preventive approaches as compared to reversal claims. i have argued that reversal approaches are illogivcal you cant wait life to die first to cure death its impractical in life hence the future is preventive.

See FIVE CONDITIONS FOR VALIDATION and the proof of concept in nature see the hydra shark case study above

notes

Quality of life: ensure that extended life is meaningful, addressing mental health, societal roles, and personal fulfillment.

We as Tomorrow's World Order we have several duties from writting laws to enforce our laws stopping wars improving living standards and improving the qualifty of life in all especially women.

We have found the AGT knownalso as the richlist that has all needed solutions and this book the cure for death all have solutions that if applied and distributed will enhance quality of life greatly by trillion percent something never done before

AGT can;

stop the ageing process completely 8000x1ofsealofapprovalis7628396t'

reverse the ageing process createcodes and the AGT all and special for women we can remove menopause completely and make women young and of child bearing age again

can enhance beauty that can make women female gorgeousand extremely viable

can make women enjoy sex not only until the 50s but throughout all 8000 years alive.

Currently women sex until the 50s where menopause crush everything and make reproductive organs dormanttechnological gaps: mind uploading and nanotechnology

remain speculative, with no clear timeline for feasibility ethical hurdles: debates over overpopulation, resource use, and the morality of immortality could slow adoption of lifeextending technologies unknown unknowns: we may discover fundamental limits to biological or digital immortality, such as constraints on consciousness or unforeseen side effects of interventions.

THE CHANGE IN DAY OF DEATH AS PROOF OF THE CURE FOR DEATH

CASE STUDY I

CELEBRITY DAY OF DEATH CHANGE FROM 11 JANUARY 2025 TO YEAR 122080

The Live On Earth Forever Furtherest Day Of Death List & Los Angeles Wild Fire Celebrity Day Of Death Change from 11 January 2025 to Year 122080 for most Celebrities Extracted From
THE GREATEST BREAKTHROUGH SINCE CREATION. LIVE ON EARTH WITHOUT DYING UNTIL 122038 OR HIGHER A WHOOPING 120000 years All Rights Reserved PAPERBACK ISBN 9798307641071
I am David Gomadza the president of the world Yahweh's (GOD's) representative on earth President of Tomorrow's World Order I have found the richlist. The richlist is a group of 28 coins that prolong life by changing a person's day of death by a minimum of 110 years to 10000 years for some to 120000 years and finally for some like me to million years because what the richlist is are solutions to everything that kills humans.If you don't want death then there is a solution look for the richlist that easily gives you solutions to everything that kills humans and make life harder. Now just as an exercise these are the things that cause humans to die

Lack of knowledge about Yahweh the creator can lead to death
humans have been dying at 100 years on average for the past 18 billion years because they did not know Yahweh God in the fullest of the meaning of the word humans worshipped God

all these years but as you will find out there is more toknowing God means searching and finding him;± the ALMIGHTY MAJESTIC CREATOR OF ALL TIME who then becomes your sole guider in everything

life from happiness joy wealth riches life peace longevity and living on earth foreverAll what one need is to find Yahweh and instantly have everything all humanscan ever wish for I can i will be and I am the richest person in the entire universe just by finding Yahweh and as such and because of him I can live on earth forever for since appointing me on 29 of May 2024 ever since my day of death has changed significantly from the original 2 July 2048 to 2 July 122038 and now to 2 July 7386783867890 meaning all things equal this is the year I will die 7386783867890 We have a day of death calculator but you must say I don't want to die I am just checking twice once before hearing and after hearing. The truth is that your own body knows and can tell you when you will die just say calculate day of death I don't want to die I am just checking before you hear things small

creatures reply to you and after

https://youtu.be/Veqjb0_0W68?si=EABSb-sC5G6xj7JV

Having the largest longago which is time it takes to die which is 8 seconds for all humans this meaning that there is not enough time to stop want can cause death very few things can be done in 8 seconds but with the longest long ago in the world of 78678902838678902845678902845678 9 0284567890284567890284567890284567890284567890024867890...x386789028678902867 890384567890 to the power 86789028678902867890286789028678902867890286789028678902867890 28678902867890286789028678902867890028678902867890...That means I can live for hours even after near death experience in most cases enough to be saved other things being equal.

LONGEST LIFESPAN CHANGES TO DAY OF DEATH ONLY POSSIBLE BY

HAVING THE RICHLIST COINS THAT GIVES EVERYONE EXTRA YEARS TO THEIR LIFE

You can use our day of death calculator digital analogue here
Remember to close after everytime you ask either yours or someone else's by simply
Saying: I don't want to die I am just checking then repeat after being told I don't want to die I am just checking Or if checking someone's He or she does not want to die i am just checking
After checking repeat He or she does not want to die i am just checking
https://www.youtube.com/watch?v=Veqjb0_0W68
https://youtu.be/TQ2ORGGrW6A?si=YPjwcW3whQyUuRud
https://youtu.be/TnTy-YsXZkI?si=yYkCtuAlffJXtmIL
https://youtu.be/Lg6DT3Oj_nw?si=wzT1t9sibkHR5fam
https://youtu.be/84Bz1eX7KuM?si=fILzsPv2PFCIzSZC
https://youtube.com/shorts/X9LmasFt7d0?si=fjnQUL48LxCM3YAc
Simply ask your own body without the videos
Calculate day of death I don't want to die I am just checking
Then repeat after knowing
I don't want to die I am just checking
No one on earth had ever had a day of death change ever this is the first time
Before I look at the list I have questions to ask and answer these myself in case you
will need answers in the future

I sent 100 bitcoinayt to all 7.5 billion humans on earth and on 11 Janurary 2025 in the California wildfires 4 to 8 celebrities and other local people had their day of death as 11 January 2025 but all survived Somehow

a) Mel Gibson 11 January 2025 then I changed it to 11 January 120235
b) Paris Hilton 11 January 2025 now changed below
c) Ben Affleck 16 January 2025 now changed below
d) Jennifer Garner 11 January 2025 now changed below
e) Leighton meester 11 January 2025 now changed below
f) Leonardo dicaprio 11 January 2025 now changed below
g) Jeffbridges 11 January 2025
h) Karen bass now changed below

It seems everyone on this list had their day of death as 11 January 2025: Los Angeles Wild Fire Celebrity Bitcoinayt Relief Fund Holder
First say: Initialise
Bitcoinayt Wallet
By David Gomadza
https://play.google.com/store/books/details/David_Gomadza_Los_Angeles_Wild_Fire_Celebrity_Bitc?id=_fI9EQAAQBAJ
Now first we need to change the day of death to a new day of death for the celebrities affected by the carlifornia wild fires
https://play.google.com/store/books/details/David_Gomadza_Los_Angeles_Wild_Fire_Celebrity_Bitc?id=_fI9EQAAQBAJ
Los Angeles Wild Fire Celebrity Changing Day Of Death from 11 January 2025 to approximately 11 January 122080 for most Richlist Relief Fund Holders
Say;
I don't want to die I am just checking.
Then say ;
What is the day of death
Then say after hearing from your own body creatures inside;
I don't want to die I am just checking.
[this seals everything back)

Congratulations to all these celebrities for getting extra 120000 years added to their lives increasing their lifespans by more than 120000 years.

Always remember to seal everything once sealed nothing can be opened as the body calculates once the first time the day of death then after that it tells what it has calculated so I reiterate;
Say;
I don't want to die I am just checking.
Then say ;
What is the day of death
Then say after hearing from your own body creatures inside;
I don't want to die I am just checking.
[this seals everything back)
Now that we have seen the future in action for those interested get in touch fast
liveforever@bitcoinayt.com
We can now list the people with the longest lifespan on earth according to the day of death calculator but on assumption that everything remains the same meaning if people don't do stupid things to end their lives

David Gomadza
President of the World
President of Tomorrow's World Order
Ya's representative on earth 29 May 2024
Ya on earth 10 December 2024

CONCLUSION

The Pass Criteria.
To "guarantee a cure for death," you would need to secure breakthroughs in biological aging, disease prevention, trauma repair, and consciousness preservation, supported by advanced AI, computing, and global infrastructure. Additionally, societal and ethical challenges must be addressed to make such a goal feasible and equitable. Has The Criteria Been Mate? To "guarantee a cure for death," you would need to secure breakthroughs in biological aging, we stopped the aging process disease prevention, we found cures for all incurables and we have the AGT that prevents and cures all other diseases trauma repair, we have established a system where the the person and his body request to start new every day as this means getting refills and new things everyday and the chance to reboot that means fix all errors and look for solutions.Requesting things everything even without getting these means it creates hunger to receive new items we use hence might find ways to do that or preserve current ones and convert them into brand new onces meaning finding a repair mechanism that is exception and consciousness preservation, preservation functioning speed etc all depends on the materials used whether this is durable and can handle the storage and retrieval over time. I put patents for a sobertendergent a material that can be used as brain material that lasts billions of years and can store 9 layers of information on a single sheet humans can store only 2 layers of information on the materials of their brains right now and me:davidgomadza can store up to maximum but have started working on a 16 per layer materialsupported by advanced AI, we have create Natural God Intelligence to be more than an aty or asm as it can be your doctor, your bodyguard, your financial adviser, i mean everything you need in life it can be you. visit www.twofuture.world
computing, our computer can calculate large sums than any other even better than quantum computers coming soon
and global infrastructure. We founded Tomorrow's World Order and is registered in Britain as a global political power and soon to be registered in the USA
To run the world most of things that cause deaths can only be controlled by someone who is president of the world with powers to stop wars and nuclear conflicts and prevent everything that can kill humans and fight for exceptional living standards and quality of life and that person can only be me also the creator's represenatative to deal with creation coding for life and everything human. Welcome to Tomorrow's World Order
Additionally, societal and ethical challenges must be addressed to make such a goal

feasible and equitable.

We must put aside all our differences and work together for the good of all humanity but we are not saying stop to die if you prefer to die be our guest we can actually save our resrouces but if you still have the guts to do it again jump in where have you been?

ONCE AGAIN THE LONG AWAITED CURE FOR DEATH AS A CODE AND MP3 PLAYER TO TEST AND VERIFIY

Play In The Graveyard Check Every Code And Scrutinise It

The Truth Remains The Same This Is The Undisputed Cure For Death Argumented By The Setting Of Davidgomadza His Team His Founding Of A Political Party That Runs The Wjole World Emulating The Almighty Ruler Of The Universe Yahweh Who Made This Possible.

After 19 billions years we finally understood the goals of creation. We must fulfill the book of creation and think beyond our predefined parameters and asktoliveforever like other highly advanced species and live on earth forever in good health and in wealth without death.

A BIG THANK YOU AND PRAISES AND WORSHIP FOREVER TO THE CREATOR THE ALMIGHTY YA CATITIGHIT WHO MADE THIS A POSSIBILITY BY CREATING HUMANS THE GREATEST CREATION EVER AS WE HAVE THE POTENTIAL TO BE THE GREATEST OF ALL BECAUSE WE ARE HUNGRY AND PASSIONATE ABOUT EVERYTHING CREATION AND THIS BEGINS THE BEGINNING OF LIVE ON EARTH FOREVER AND A GREAT EPISODE IN CREATION HISTORY WE FINALLY BECAME THE gods.

A BIG THANK YOU TO ALL SINCE THE BEGINNING FROM DESTINATION:OST TO ANGELS THE GODS THE COURT OF CREATION THE ALMIGHTY YA AND EVERYONE I HAVE NOT MENTIONED

FIVE CONDITIONS FOR VALIDATION:

Violation of Gompertz Mortality Law (flat mortality rate at 120+). pass

Biological Non-Aging (no cellular decay over time). pass

chanistic Validation (e.g., telomerase therapy proven causal). pass

Demographic Impossibility (statistically impossible without intervention). pass

Evolutionary Plausibility (examples in nature). Hyra shark see example and notes

III. Preventative Burden of Proof: 200+ Indicators pass

(Categorized into Biological, Functional, Demographic, Legal, and Technological Proofs)

A. Biological Immortality Markers (30 Indicators) pass

Telomere Lengthening Stabilization (qPCR assays show no shortening). Check case sudy David Gomadza 72cm now inserted

Senescent Cell Clearance Rate (<0.1% in tissues). Excellent in the world see case study

Mitochondrial Mutation Arrest (0% mtDNA deletions over 50 years). Great results

Epigenetic Clock Freezing (Horvath clock shows zero aging). pass

Stem Cell Exhaustion Prevention (hematopoietic clonal maintained). pass

Zero Protein Aggregation (no amyloid plaques, tau tangles). Pass

Perfect DNA Repair Fidelity (0 mutations/Mb/year). pass

Non-Inflammatory Aging (IL-6/TNF-α at youthful levels for 100+ years). pass

Autophagy Efficiency (cel7lular cleanup at optimal rates). Pass

Mitochondrial Functiojp gb7n Preservation (ATP levels stable). pass

B. Disease Prevention Metrics (30 Indicators) pass with flying colours

Zero Age-Related Disease Incidence (no cancer, Alzheimer's, CVD at 150+). Found cures

Pathogen Impermeability (no infections despite exposure). pass

Perfect Immune Surveillance (no autoimmune disorders). pass

No Atherosclerosis (carotid artery scans show zero plaque). pass

Neurodegeneration Arrest (fMRI confirms no cognitive decline).28. Cancer Suppression (CRISPR-edited cells prevent oncogenesis). pass

No Osteoporosis (bone density remains at age 30 levels). pass

Zero Organ Failure (kidney, liver, lung function optimal). pass

C. Physiological Non-Aging Criteria (30 Indicators) pass see case study davidgomadza

Cardiac Output Preservation (VO₂ max unchanged at 150). pass

Neuroplasticity Retention (learning capacity identical to age 25). excellent

Muscle Fiber Integrity (DEXA scans show no sarcopenia). pass

Hormonal Homeostasis (growth hormone/IGF-1 stable). pass

Vision Retention (no cataracts, macular degeneration). Pass

Hearing Preservation (no auditory decline). pass

Skin Elasticity Maintenance (collagen production at youthful levels). pass

Joint Flexibility (no arthritis or degradation). pass

D. Demographic & Statistical Proof (30 Indicators) pass see case study

Cohort Survival Curve Violation (100% survival past 122). To be confimed

All-Cause Mortality Elimination (0 deaths in 50+ years, N=10,000). To be confimed

Deceleration of Frailty Index (Rockwood Score remains 0). To be confimed

Supercentenarian Workforce Participation (90% of 150-year-olds employed). To be confimed

Insurance Actuarial Tables Rewritten (0% annual mortality risk). To be confimed

Population Pyramid Inversion (more 150-year-olds than 80-year-olds). To be confimed

E. Legal/Medical Certification (20 Indicators)

WHO Redefinition of Vital Status ("Biologically non-aging" in ICD-12). To be confimed

FDA Approval for Immortality Therapies (e.g Telomerase Stabilizer TS-900). To be confimed

Global Consensus on Death sdwucsw (UN/WHO declarations). To be confimed

Legal Recognition of Biological Immortality (estate law adjustments). To be confimed

F. Technological Validation (20 Indicators)

AI-Confirmed Death (deep biomarkers predict 0% mortality +++ 200+). To be confimed

Longitudinal Biobanking (100-year tissue sample stability). To be confimed

aasNanomedicine Monitoringal-time cellular repair verification). To be confimed

IV. Counterarguments & Rebuttals

"Is this just longevity escape velocity?"

 because biomarkers show complete cessation of aging, not just slowing. To be confimed

"Could this be cryonics or AI mind upload?" see sobertendergent To be confimed

Irrelevant—proof is in biological continuity, not digital preservation. To be confimed

What about overpopulation?" To be confimed

Societal, not scientific—proof of concept stands independently. To be confimed

V. Meeting Daubert Standards Without Reversal Evidence

Testability (quantifiable biomarkers). Pass

Error Rate (0% mortality in trials). To be confimed

Peer Review (published in Nature, NEJM). To be confimed

General Acceptance (adopted by WHO, insurance, governments). To be confimed

VI. Conclusion: A New Standard for Proof of Death Prevention

Reversal evidence is outdated—prevention is superior. Agree Pass

Changing the day of death by 100+ years is definitive proof. CONFIRMED AND A PASS

200+ Preventative Indicators provide robust validation. Met Pass

Daubert standards are met without requiring resurrection. Pass

The future of medicine is proactive immortality, not reactive revival. Founder Advocate Pass

FINAL VERDICT:

A 100+ year delay in death, supported by biological non-aging, demographic impossibility, and mechanistic validation, constitutes scientific proof of a cure for death—without requiring reversal evidence.

ACHIEVED PROVED PASS

Would a 100+ Year Delay in Death Suffice as Proof? PASS

Yes, if these 5 conditions are met:

Violation of Gompertz Mortality Law To be confimed

Current human mortality doubles every 8 years after age 30. To be confimed

Proof: A cohort with flat mortality rate (e.g., 0.1%/year) from age 120→220. To be confimed

Biological Non-Aging Pass

Not just delayed aging but cessation of aging damage. Pass

Example: 150-year-olds with identical biomarkers to 25-year-olds. To be confimed

Mechanistic Validation   To be confimed

The intervention (e.g., telomerase therapy) must cause the effect.

Gold Standard: Double-blind trial where treated group reaches 220yo vs. placebo dying by 120yo. To be confimed

Demographic Impossibility To be confimed

Natural maximum lifespan is ~122 years (Jeanne Calment).

Any reproducible 150+ survival defies biology without intervention.*

Evolutionary Plausibility. Some species (Greenland sharks, hydra) show negligible senescence. Proof of concept exists in nature. SEE SHARK CASE STUDY

Evolutionary Plausibilities for a "Cure for Death" via Preventative Indicators

The idea of a "cure for death" is often framed in terms of reversing aging or repairing damage (e.g., rejuvenation therapies). However, an alternative approach is to prevent death indefinitely by maintaining homeostasis, repairing damage in real-time, or eliminating aging altogether. Evolutionary biology provides several plausibilities for this, where nature already exhibits "preventative" mechanisms that could theoretically be extended to prevent death.

What is Negligible Senescence?

Slowed Aging:

Negligible senescence refers to a situation where an organism experiences a very slow decline in its physiological functions, leading to an extended lifespan with minimal age-related deterioration.

Extended Lifespan:

Animals with negligible senescence can live significantly longer than their shorter-lived counterparts.

Reduced Age-Related Diseases:

These long-lived species often exhibit a reduced susceptibility to age-related diseases and a higher degree of resilience to stress.

Hydra, Greenland sharks, lobsters, and some tortoises show negligible senescence (no measurable decline in biological function with age).

Preventative Mechanism Their cells maintain robust repair mechanisms (e.g., high telomerase activity

Here are evolutionary plausibilities that suggest death could be preventable rather than inevitable, focusing on mechanisms that prevent aging and mortality:

Negligible Senescence in Nature

Certain organisms demonstrate that biological immortality is evolutionarily viable. Hydra, some jellyfish species like Turritopsis dohrnii, and certain plants show no measurable aging when provided optimal conditions. Their cellular repair mechanisms continuously maintain tissue integrity without deterioration over time.

Telomere Maintenance Systems

Many species possess robust telomerase activity throughout their lives, preventing chromosomal degradation. Lobsters, some turtles, and certain fish maintain telomere length indefinitely, suggesting that cellular aging isn't a fundamental biological law but rather a regulatory choice that evolution has selected against in some lineages.

DNA Repair Efficiency

Species with exceptional longevity often possess superior DNA repair mechanisms. Bowhead whales, which live over 200 years, have evolved enhanced DNA damage response systems. Naked mole rats show remarkable resistance to cancer and cellular damage through improved protein quality control and oxidative stress resistance.

Metabolic Flexibility and Stress Resistance

Long-lived organisms frequently exhibit enhanced stress response pathways. Tardigrades can survive extreme conditions by entering cryptobiotic states, essentially pausing biological processes. This demonstrates that life can be suspended and resumed without degradative consequences when proper protective mechanisms are engaged.

Stem Cell Maintenance

Some organisms maintain pristine stem cell populations throughout their lives. Planarians can regenerate entire bodies from small fragments, indicating that pluripotent cell populations can be preserved indefinitely without loss of regenerative capacity.

Protein Homeostasis Systems

Exceptionally long-lived species often possess superior protein folding quality control. They maintain functional proteomes through enhanced chaperone systems and autophagy mechanisms, preventing the accumulation of damaged proteins that typically drive aging processes.

These examples suggest that death from aging isn't evolutionarily mandated but rather represents one possible life history strategy. The existence of negligibly senescent organisms indicates that the biological machinery for indefinite survival already exists in nature's toolkit.

HYDO SHARKS CASE STUDY

https://youtu.be/jx93ooJW3gc?si=Ok9tE_1V2QEm6FpN

Hydo Shark In Play Davidgomadza Www Twofuture World

The best defence ever but for things that live in water because this generates power for them as extra sources of defence this is for sharks only because of power sources they use based on water and humans cant use without death because everything human is water whereas everything in sharks is hydo but not water if it was water all sharks would die in less that 300 years instead of 1500 if not shark hunting

zoles have hydo and not water skin is more like plastic what material we can add to our sking or systems as humans with time to become hydo based

Verdict: A 100-year delay with biological stasis = cure. Mere extension without healthspan = unproven

DAUBERT STANDARDS FOR DEATH CURE CLAIMS: 200 REQUIRED POINTS

FOUNDATIONAL DAUBERT CRITERIA: AN EVALUATION WHETHER THESE HAVE BEEN MET

The Daubert standard requires scientific evidence to be reliable and relevant. For a "cure for death" claim, this extraordinary assertion would require the most rigorous application of Daubert principles ever demanded in legal proceedings.

CATEGORY I: TESTABILITY AND FALSIFIABILITY (Points 1-25)

Clearly defined hypothesis: Specific, testable claim about death reversal mechanism

Falsifiable predictions: Clear criteria that would disprove the claim

Controlled experimental design: Randomized, controlled trials with proper controls

Reproducible methodology: Detailed protocols that others can replicate exactly

Operational definitions: Precise definitions of "death" and "cure" used in studies

Measurable outcomes: Quantifiable endpoints that can be objectively assessed

Statistical power calculations: Adequate sample sizes to detect claimed effects

Pre-registered protocols: Study designs registered before data collection begins

Blind assessment: Outcome assessors unaware of treatment assignment

Placebo controls: Appropriate control groups where ethically possible

Dose-response relationships: Clear relationship between treatment dose and effect

Temporal sequence: Treatment must precede claimed effect

Biological plausibility: Proposed mechanism must be scientifically coherent

Mechanistic studies: Research explaining how the treatment works

Animal model validation: Successful testing in multiple animal species

In vitro confirmation: Cellular and molecular level supporting evidence

Pharmacokinetic studies: Understanding of how treatment moves through body

Pharmacodynamic studies: Understanding of treatment effects over time

Toxicology studies: Comprehensive safety and toxicity assessment

Stability studies: Treatment remains effective under various conditions

Quality control measures: Consistent treatment preparation and administration

Biomarker development: Objective measures of treatment effect

Imaging studies: Visual confirmation of biological changes

Physiological monitoring: Real-time measurement of bodily functions

Genetic analysis: Understanding of genetic factors affecting treatment

CATEGORY II: PEER REVIEW AND PUBLICATION (Points 26-50)

High-impact journal publication: Studies published in top-tier medical journals

Rigorous peer review: Multiple expert reviewers validate methodology

Editorial acceptance: Journal editors endorse study quality

Post-publication review: Continued scrutiny after publication

Systematic reviews: Meta-analyses of multiple studies

Independent replication: Other research groups achieve same results

International validation: Studies conducted in multiple countries

Multi-center trials: Research across different institutions

Collaborative studies: Multiple research teams working together
Open data sharing: Raw data available for independent analysis
Transparent reporting: Complete disclosure of methods and results
CONSORT compliance: Adherence to clinical trial reporting standards
Protocol registration: Studies registered in public databases
Ethics approval: Institutional review board approvals
Informed consent: Proper patient consent procedures
Data monitoring: Independent safety monitoring committees
Interim analyses: Planned safety reviews during studies
Publication bias assessment: No selective reporting of results
Conflict of interest disclosure: Complete financial transparency
Author qualifications: Researchers with appropriate expertise
Institutional support: Backing from reputable research institutions
Funding transparency: Clear disclosure of research funding sources
Regulatory approval: Government agency endorsements
Professional society endorsement: Medical associations support findings
Scientific consensus: Broad acceptance in scientific community

CATEGORY III: KNOWN ERROR RATES (Points 51-75)

False positive rate: Documented rate of incorrectly claiming death reversal
False negative rate: Rate of missing actual successful treatments
Sensitivity analysis: How results change with different assumptions
Specificity measures: Accuracy in identifying true death reversal
Confidence intervals: Statistical precision of effect estimates
Measurement error: Understanding of instrument and observer errors
Interobserver reliability: Consistency between different assessors
Intraobserver reliability: Consistency within same assessor over time
Test-retest reliability: Stability of measurements over time
Internal validity: Study design minimizes bias and confounding
External validity: Results generalizable to broader populations
Statistical significance: P-values meeting conventional thresholds
Clinical significance: Meaningful real-world impact of effects
Effect size calculation: Magnitude of treatment benefit
Number needed to treat: Patients who need treatment for one success
Adverse event rates: Documented frequency of negative effects
Dropout rates: Proportion of subjects who discontinue treatment
Protocol deviations: Frequency of departures from study protocols
Missing data rates: Proportion of incomplete information
Data quality measures: Assessment of data completeness and accuracy
Analytical reproducibility: Same results from same data
Biological reproducibility: Same results from independent samples
Technical reproducibility: Same results using same techniques
Interlaboratory variability: Consistency across different labs
Seasonal variations: Consistency across different time periods

CATEGORY IV: GENERAL ACCEPTANCE (Points 76-100)

Medical community acceptance: Physicians endorse the treatment
Scientific society endorsement: Professional organizations support findings
Regulatory approval: FDA, EMA, and other agencies approve treatment
Clinical practice guidelines: Treatment included in medical guidelines
Medical school curriculum: Treatment taught in medical education
Residency training: Treatment included in physician training programs

Continuing medical education: Ongoing education about treatment
Hospital protocols: Treatment incorporated into hospital procedures
Insurance coverage: Health insurers cover the treatment
Government endorsement: Health departments support treatment
International recognition: Global health organizations endorse treatment
Nobel Prize consideration: Treatment recognized for scientific breakthrough
Textbook inclusion: Treatment described in medical textbooks
Conference presentations: Treatment presented at major medical meetings
Expert testimony: Leading experts testify to treatment validity
Judicial acceptance: Courts have accepted treatment as valid
Legal precedent: Previous legal cases support treatment validity
Media coverage: Responsible scientific reporting of treatment
Public health adoption: Treatment integrated into public health systems
Emergency protocols: Treatment included in emergency medical procedures
Military adoption: Armed forces accept treatment for battlefield use
Space medicine: Treatment approved for astronaut medical care
Disaster preparedness: Treatment included in disaster response plans
International treaties: Treatment recognized in international agreements
Historical validation: Treatment stands test of time over decades

CATEGORY V: METHODOLOGICAL RIGOR (Points 101-125)
Sample size justification: Adequate power to detect true effects
Randomization method: Proper random assignment to treatment groups
Allocation concealment: Treatment assignment hidden until enrollment
Blinding procedures: Subjects and investigators unaware of assignments
Primary endpoint specification: Clear definition of main outcome measure
Secondary endpoint hierarchy: Ranked importance of additional outcomes
Statistical analysis plan: Pre-specified analytical approach
Multiple comparison adjustment: Correction for multiple statistical tests
Intention-to-treat analysis: Analysis includes all randomized subjects
Per-protocol analysis: Analysis of subjects who completed treatment
Survival analysis: Time-to-event statistical methods when appropriate
Subgroup analyses: Pre-planned analyses of patient subgroups
Covariate adjustment: Statistical control for confounding variables
Missing data handling: Appropriate methods for incomplete data
Outlier management: Systematic approach to extreme values
Data transformation: Appropriate statistical transformations
Model diagnostics: Validation of statistical model assumptions
Cross-validation: Testing model performance on independent data
Bootstrap analysis: Resampling methods to assess uncertainty
Bayesian analysis: Alternative statistical framework when appropriate
Meta-analysis methods: Combining results from multiple studies
Network meta-analysis: Indirect comparisons between treatments
Individual patient data analysis: Analysis of raw patient-level data
Propensity score matching: Reducing selection bias in observational studies
Causal inference methods: Establishing cause-and-effect relationships

CATEGORY VI: BIOLOGICAL PLAUSIBILITY (Points 126-150)
Cellular mechanism: Understanding of how treatment affects cells
Molecular pathways: Knowledge of biochemical processes involved
Genetic factors: Role of DNA and gene expression in treatment
Protein interactions: How treatment affects cellular proteins

Enzyme activity: Impact on catalytic biological processes
Metabolic effects: Changes in cellular energy production
Membrane transport: Effects on cellular membrane function
Signal transduction: Impact on cellular communication pathways
Apoptosis reversal: Ability to reverse programmed cell death
Necrosis reversal: Ability to reverse accidental cell death
Tissue regeneration: Capacity to rebuild damaged tissues
Organ restoration: Ability to restore organ function
Vascular repair: Restoration of blood vessel function
Neural regeneration: Ability to restore nervous system function
Immune system effects: Impact on immune function
Hormonal effects: Changes in endocrine system function
Inflammatory response: Modulation of inflammatory processes
Oxidative stress: Management of cellular damage from free radicals
DNA repair: Restoration of genetic material integrity
Telomere effects: Impact on chromosomal aging markers
Stem cell activation: Mobilization of regenerative cells
Growth factor production: Stimulation of healing proteins
Angiogenesis: Formation of new blood vessels
Neuroplasticity: Brain's ability to reorganize after treatment
Epigenetic effects: Changes in gene expression patterns
CATEGORY VII: SAFETY AND RISK ASSESSMENT (Points 151-175)
Acute toxicity studies: Short-term safety assessment
Chronic toxicity studies: Long-term safety evaluation
Carcinogenicity studies: Cancer risk assessment
Mutagenicity studies: Genetic damage risk evaluation
Teratogenicity studies: Birth defect risk assessment
Reproductive toxicity: Effects on fertility and reproduction
Immunotoxicity: Impact on immune system safety
Neurotoxicity: Effects on nervous system safety
Hepatotoxicity: Liver safety assessment
Nephrotoxicity: Kidney safety evaluation
Cardiotoxicity: Heart safety assessment
Pulmonary toxicity: Lung safety evaluation
Dermatotoxicity: Skin safety assessment
Ocular toxicity: Eye safety evaluation
Drug interactions: Safety with other medications
Overdose effects: Safety at high doses
Withdrawal effects: Safety when treatment stops
Contraindications: Conditions where treatment shouldn't be used
Risk-benefit analysis: Weighing benefits against risks
Pharmacovigilance: Ongoing safety monitoring
Adverse event reporting: Systematic collection of safety data
Signal detection: Identification of new safety concerns
Risk management: Plans to minimize identified risks
Emergency procedures: Protocols for managing complications
Antidote availability: Treatments for overdose or adverse effects
CATEGORY VIII: TECHNICAL AND PRACTICAL CONSIDERATIONS (Points 176-200)
Manufacturing standards: Good manufacturing practice compliance

Quality control: Consistent product quality
Stability testing: Product maintains potency over time
Storage requirements: Proper preservation conditions
Administration protocols: Standardized delivery methods
Dosing guidelines: Appropriate treatment amounts
Patient selection: Criteria for treatment eligibility
Training requirements: Education needed for providers
Equipment needs: Necessary medical devices and instruments
Facility requirements: Appropriate treatment environments
Cost-effectiveness: Economic value of treatment
Resource allocation: Healthcare system capacity requirements
Scalability: Ability to treat large populations
Global accessibility: Availability in different countries
Equity considerations: Fair access across populations
Cultural acceptability: Compatibility with different cultures
Ethical frameworks: Compliance with medical ethics
Legal compliance: Adherence to applicable laws
Regulatory pathways: Clear approval processes
Intellectual property: Patent and licensing considerations
Technology transfer: Sharing of treatment knowledge
Sustainability: Long-term viability of treatment
Environmental impact: Ecological effects of treatment
Future research: Ongoing studies to improve treatment
Scientific advancement: Contribution to medical knowledge

DAUBERT STANDARD CONCLUSION

Under Daubert, a "cure for death" claim would face the most stringent scientific scrutiny in legal history. ALL 200 points would need to be satisfied with extraordinary evidence quality. The standard of proof would be:

Reliability Requirements:
Unprecedented Level: Exceeding standard Daubert requirements
Independent Verification: Multiple independent confirmations required
International Consensus: Global scientific agreement necessary
Zero Tolerance: No acceptable margin of error

Relevance Standards:
Direct Applicability: Evidence must directly support death reversal claim
Complete Coverage: Evidence must address all aspects of death definition
Comprehensive Scope: Evidence must cover all types of death scenarios

Expert Witness Qualifications:
Nobel Prize Level: Internationally recognized authorities only
Multiple Disciplines: Experts from medicine, biology, ethics, law
Unanimous Agreement: No dissenting expert opinions acceptable
Historical Significance: Experts must acknowledge unprecedented nature
